#### **Effektiv master data management i en moderne Supply Chain og Omnichannel verden.**

Mange selskaper har mange systemer å forholde seg til, en mengde leverandører og ulike plattformer for salg og tilbud av sine produkter. Kombinasjonen av stor varedatamengde, avansert logistikk og ulike software skaper mange uløste utfordringer hvor små feil/avvik forplanter seg ut i systemene og skaper store utfordringer. Vince og Plantasjen vil fortelle om hvordan dette er håndtert effektivt hos Plantasjen. Vi vil også belyse hvordan man jobbe mer effektiv på denne måten, og oppnå en høyere leveringsgrad til markedet. Olav Fyldeng, CIO, Plantasjen og Stine Cruz, Sr. Business Consultant, Vince
