Roadmap

Digital Transformation

...to drive your innovation and progress

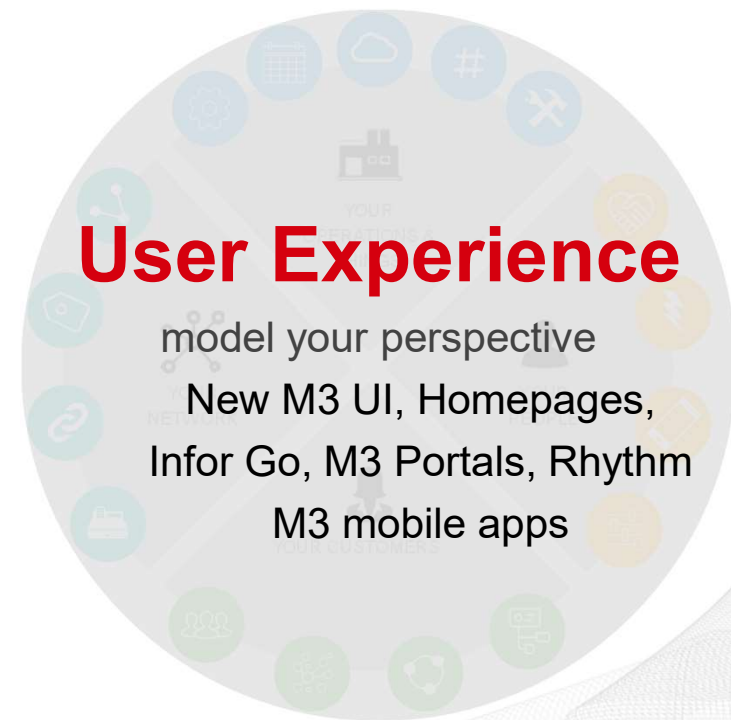

The Infor logo, consisting of the word "infor" in white lowercase letters on a red square background. The background of the slide features a dark blue, glowing network of interconnected nodes and lines, resembling a digital or data network, extending from the bottom left towards the top right.

infor

Digital solutions at a much faster pace

THE PILLARS OF DIGITALIZATION

- **API economy** – the connected enterprise
 - M3 APIs continuously being enhanced
 - Secure exposure through ION API and API orchestration
 - Infor IOT to handle your devices
- **Big data** – centralized repository in Cloud
 - Infor Data Lake keeps all your data and transactions
 - Near to infinite storage in the cloud
 - Universal access through Compass
- **AI Platform** – automate and enhance decisions
 - Infor Coleman provides an integrated AI platform
 - Digital assistance, machine learning and robotic automation
 - Automate your business processes

Transformation is Constant

ERP requirements in the world of Digital Transformation

STANDARDIZED

Single global instance to form a digital backbone – industry-focused

INTEGRATED

Focus on automation and growth – products, geographies & services

FLEXIBLE

Ease of configuration and the power of tailoring

SECURE

Support for security best-practices; continuous monitoring

FLUID

Always current; scale for season, growth and new business models

INNOVATIVE

Continuously enable new technologies and innovations

... and always stay **SUPER CURRENT**

WHY INFOR

A Magic Quadrant Leader

Gartner Recognizes Infor as a Leader in the 2021 Gartner® Magic Quadrant™ for Cloud ERP for Product-Centric Enterprises.

*“By 2023, organizations that have successfully renovated their ERP platforms will achieve at least a **40% improvement in IT agility** to deliver business outcomes, and 60% of product-centric enterprises will **utilize standardized ERP capabilities** on a composable ERP platform.”*

The trend is clear. The ERP for product-centric enterprises market is accelerating its transition to cloud deployment models.

“Significantly, 2020 clearly demonstrated the benefits of cloud ERP, with the pandemic creating more urgency for end-user adoption.”

Roadmap

Drivers influencing our product investments

Market Analysis

- Market size per segment
- Solution fit by geo
- Industry spent

Customers

- M3 Industry and customer boards
- MT customers
- Enhancement Requests

Industry 4.0

- Need for a digital backbone
- Need for automation and insight
- Innovation opportunities driven by Cloud

Thought Leadership

- Connected supply chain
- Technology as a value enabler
- Prescriptive implementation

Competitive Landscape

- SAP & Microsoft
- Industry specific cloud battleground
- Re-entry of SMB space

INFOR M3

Here's what we are investing in

Industry

Provide deep, vertical capabilities and content to drive customer value and adoption

Deeper extensibility to provide more project agility

Cloud

Investing in Cloud services to meet the evolving industry and global requirements. Enabling the agility and scalability to support changing business strategies

Experiences

Deliver user satisfaction and productivity through an intuitive experience. Expanding access to core business processes for wider user group throughout the enterprise

Innovation

Utilizing Cloud technologies and big data to provide innovative new ways of doing business

IDC predictions 2021: Cloud native, Industry Clouds, SaaS and data centric

INFOR M3

Innovation

Enable ERP to deliver new experiences through automation and integration

Support businesses to be nimble and flexible through data insights and automation

Modify and extend M3 business engine logic

- Write customer specific logic
- Based on Groovy, a Java based language
- Executed by *Exit Points* in M3 programs
- Portable between tenants/environments

Recently added custom tables, custom APIs, integration to Data Lake

ICS and partners certified – Approval process for deploying in PROD

```

2021

XtendM3 –extending and adapting your business logic

BUSINESS OUTCOME #1

Allow custom code within a multi-tenant environment

BUSINESS OUTCOME #2

Extend the M3 data model with custom tables

BUSINESS OUTCOME #3

Centrally controlled and deployed code for easy administration

INFOR M3

Industry

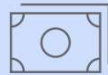

Dominate with deep, vertical, and adjacent industry expertise to delivery solutions that meet your unique needs

Accelerate your cloud adoption with industry-specific embedded business processes

Establish Agreement

- Rebates
- Bonus
- Trade promo
- Commissions

Debt Accrual

- Advanced accrual rules
- Integrated financials for debt and P/L

Agreement re-generation

- Late arrival
- Changed scope or terms
- Re-gen of accruals and update financials

Claims and Settlements

- Credit note
- Bank transfer
- Claims in AP
- Deductions in AR
- Scan-based claims

Final Settlement and Closure

- Close off
- Reverse non-settled accruals and debts.
- Re-distribute variances for P/L at customer and item.

2021

Retrospective Trade Agreements deliver:

BUSINESS OUTCOME #1

Accruals with re-regeneration for accurate financial statements and margin at customer / item

BUSINESS OUTCOME #2

Reduce losses due to false deductions and claims

BUSINESS OUTCOME #3

Automate to reduce admin burden of managing trade agreements

infor

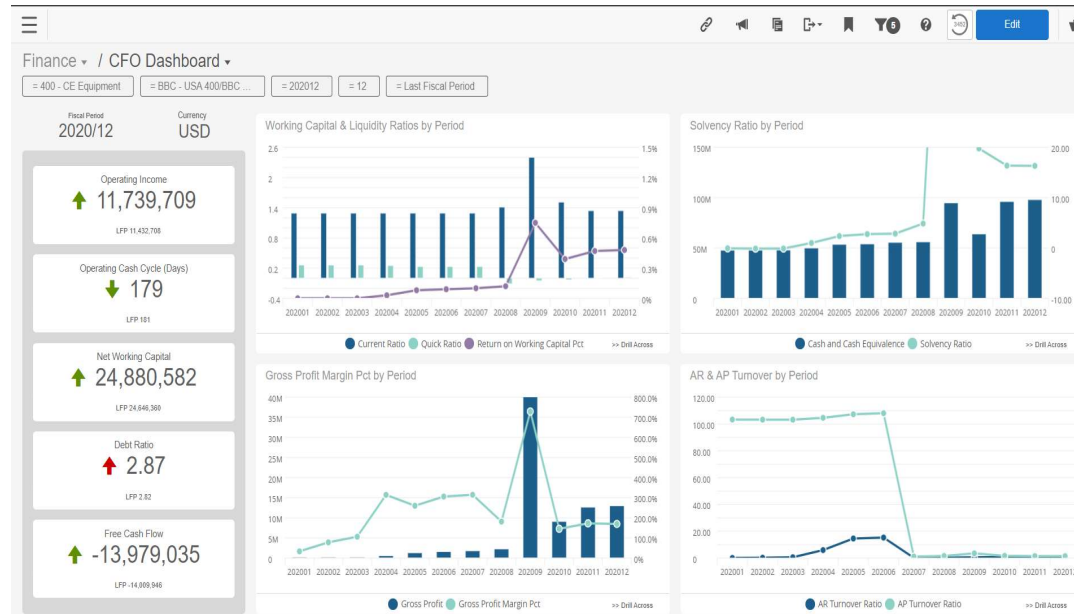

M3 CLOUDSUITES – Product Strategy | Se

INFOR M3

Experiences

Modernize and simplify to deliver a seamless and intuitive experience

Promote human-centered design to deliver user satisfaction through increased efficiency and productivity

2021

M3 Analytics: CFO Dashboards

BUSINESS OUTCOME #1

Help executives with the insights they need to understand their company's financial/business performance

BUSINESS OUTCOME #2

Delivering high-level ratios and metrics derived from M3 financial data.

BUSINESS OUTCOME #3

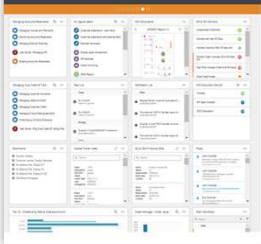

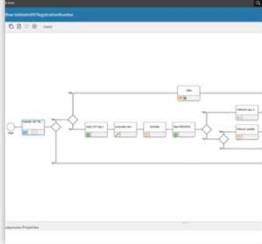

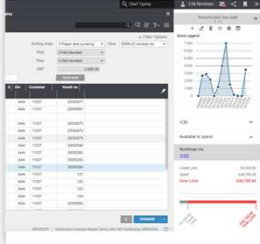

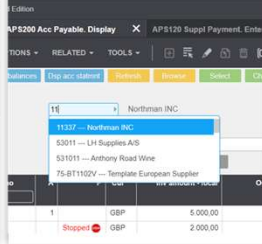

Built from the rich M3 Analytics to support decision makers at various levels of the organization.

INFOR M3

Experiences

Modernize and simplify to deliver a seamless and intuitive experience

Promote human-centered design to deliver user satisfaction through increased efficiency and productivity

Homepages	Workflows	Context Apps	Scripts	IDM + Excel
User friendly and finance area specific	Workflows to improve financial processes	Maximize information to user in a program	Small features to increase speed and agility	Better reporting and printouts
				

2021

Financials 4.0 – visual finance through Infor OS:

BUSINESS OUTCOME #1

Higher productivity through rich content

BUSINESS OUTCOME #2

Provides further inspiration to deeper adoption of available tools

BUSINESS OUTCOME #3

More value from existing applications

INFOR M3

Cloud

Increased scalability to propel quicker deployments

Deliver business critical innovations without interruptions

2021

Corporate Accounting and Reporting benefits customers by:

BUSINESS OUTCOME #1

Enables global companies to report under multiple rules such as local GAAP, IFRS or other rules.

BUSINESS OUTCOME #2

Different valuation methods to apply for valuation of fixed assets, inventory, work in progress, currency re-valuations.

BUSINESS OUTCOME #3

Ensure correct balance sheets and costs in profit and lost reports. Finally change the automatic year end process

Dual chart of accounts

Allowing companies to operate with multiple chart of accounts

Multiple valuation methods

Introduce multiple valuations for inventory, customer bad debts and currency revaluations

Multiple books

Classify the voucher into different accounting books

Reporting

Allow reporting depending on selected accounting book

Selected Highlights Already Delivered in 2021

1800+ net changes

Industry

- Retrospective Trade Agreement
- Grower contract with invoice matching
- Dynamic aging of lots
- Major Mobile Field Srv. Enhancements
- Nexus for connected enterprise network
- Target Buying at Item Warehouse Level

Cloud

- Corporate Accounting and Reporting
- Guatemala, Turkey, Philippines
- Exemption letter, Italy and Philippines
- Intrastat update 2022
- d/EPM for Budgeting & Planning
- PLM for Process – utilizing Data Lake
- Zero downtime for patching
- Improved search architecture

Experiences

- CFO Dashboards
- Integrated Analytics utilizing Infor OS
- Financial 4.0
- Factory Track incl. Sublots, Alt. UoM and pack size support
- SalesHub homepage widgets

Innovation

- Coleman AI – 3 ML models – 1 optimization model
- Coleman Digital assistant
- XtendM3 – Dynamic tables, Data Lake, APIs
- Integration tool enhancements – customer messages

Delivered in core product

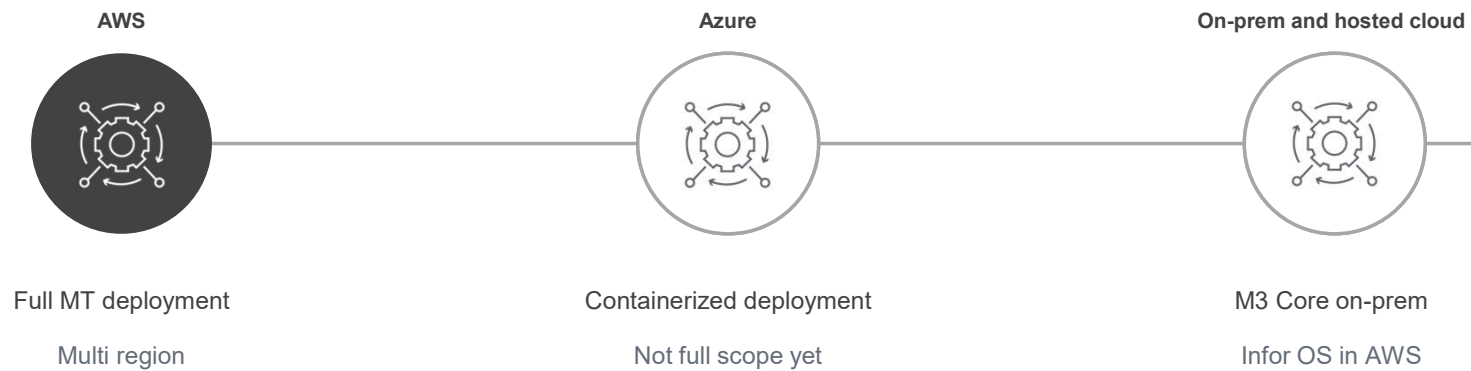

12-month outlook

USABILITY	CAPABILITY	INDUSTRY
M3 New UX platform	Integration to Infor WMS improved; New for Infor TMS & Nexus TMS	Central Procurement Process Flow
M3 Analytics - C-Suite Dashboards	Integration with Salesforce.com & Dynamics CRM	Customer Contact at Customer Order Entry
M3 Analytics – Opportunity Management and Project Portfolio	Integration to Global Risk & Compliance Watchlist Insight	Common credit stop function for M3
Enhanced item search in Mobile Field Service	Integration with Infor Distribution Proof of Delivery	Configurable Text Blocks for external documents
New real-time dashboards in M3 CLM	Modern M3 including mega scale and lower maintenance time	Digital signatures – 21CFR Part11 compliant
M3 Portal: Issue Management and Equipment Self service capabilities	Israel M3 Country Version	Movement of goods under PO-inspection
XtendM3: More tooling capabilities	Containerized M3 for on-premise (Self-Hosted) - Controlled Availability	Allow for multiple parallel deliveries per order line
20+ re-designed homepages	E-invoice: Egypt, Saudi, Indonesia, Czech, Australia, New Zealand	Internal Sales Order – multiple additions
New standard M3 Widgets	Customer deposits and tax handling	Retrospective Trade agreements - Phase 2

M3 SINGLE VERSION OF THE SOFTWARE

M3 Multi cloud and on prem

One codebase, common tools, common administration, everyone is running latest version

Common extensibility tooling – no java modifications

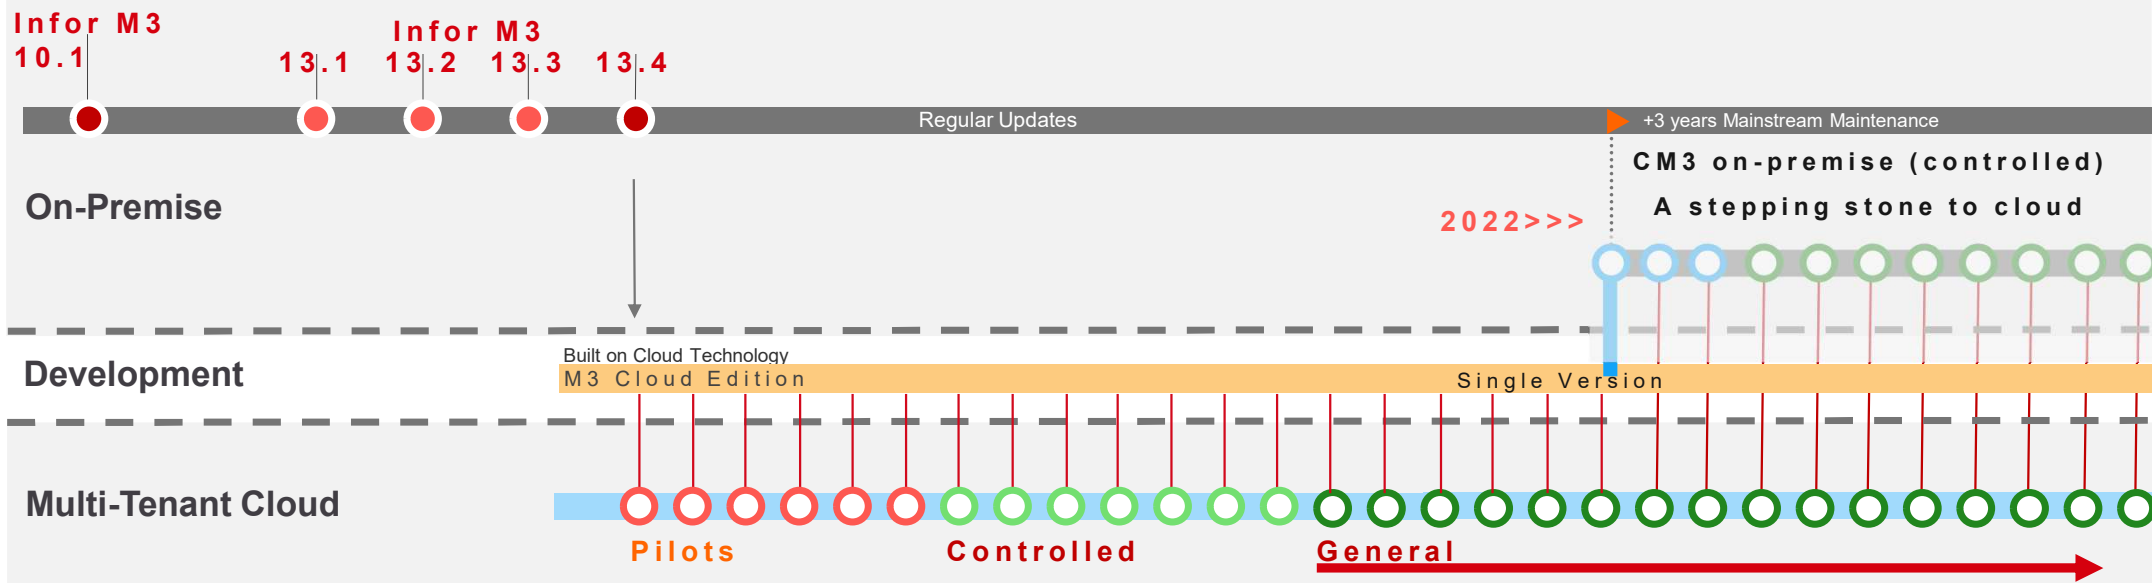

Going forward all deployments will be based on single containerized solution

M3 DIRECTIONS

The M3 evolution

M3 Cloud

- Fluid and agile
- Full usage of cloud
- Continuous deliverables
- New Technologies; new innovations; industry analytics
- All investment focus is Cloud

Globally Deployed from: North America, Europe, North Asia & Australia

R&D

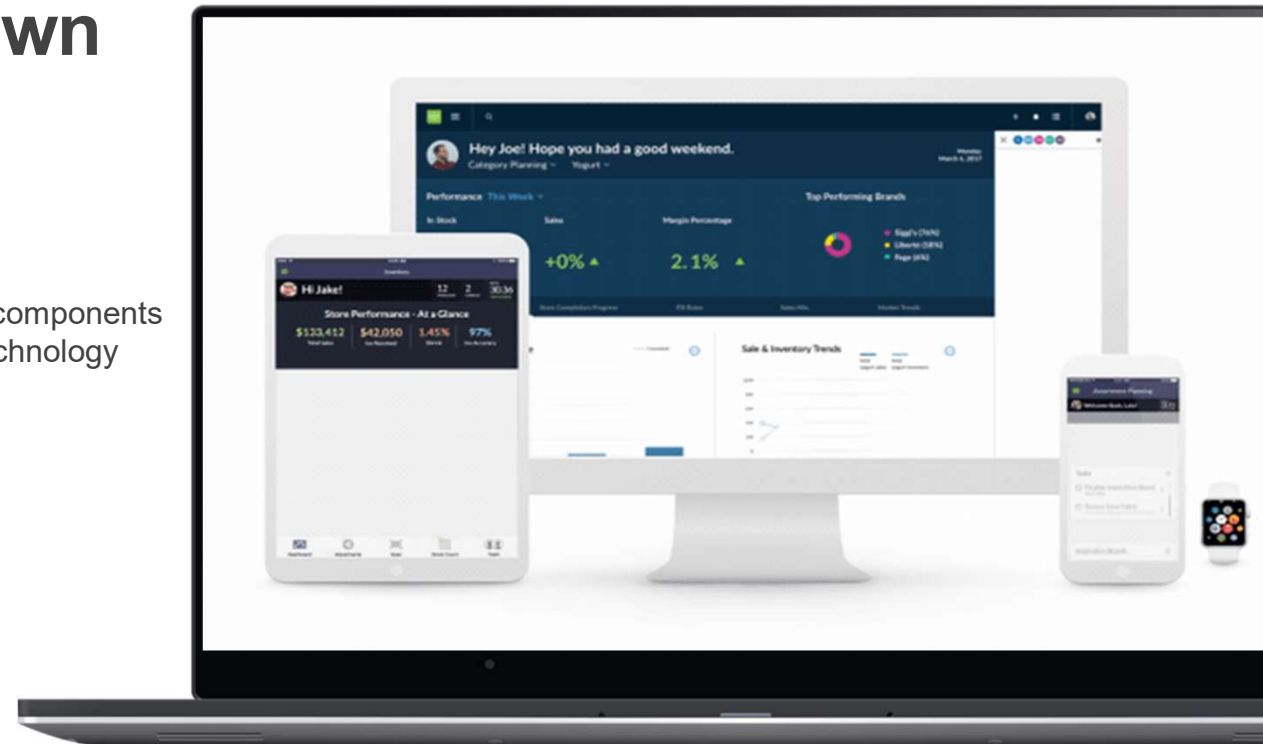

CM3: Core M3 in your own datacenter

New Technology for On-Premise

- CM3 is containerized M3 business engine and core components
- Proven M3 functionality from the M3 cloud edition technology
- Infor OS MT cloud required
- Major modernizations – no java modifications
- Regular delivery of new features
- Controlled by Toggles
- Extensible via XtendM3 and more
- Controlled available

Platform Support (To be determined)

- Win/SQL **Pilots planned for Q1/2022**
- IBM P-series/DB2/400
- Linux/Postgres

CM3 On-Premise Release

VALUE

- Run in your own data center
- Access to latest M3 features
- Control
- Potential access to DB
- Access to modernized tooling and infrastructure
- **Will require Infor OS in Cloud**

BEST PRACTICES

- Business logic adjustments done with extensibility tooling (XtendM3)
- Use IONAPIs and BODs for integration
- Update often – all corrections done on latest version

CONSIDERATIONS

- Customer is responsible for infrastructure operations – for example HA/DR/Scaling, backups and security
- No access to source code and no code changes
- Upgrade investment similar to Cloud
- The long-term strategic choice for Infor is cloud
- ...so why not go cloud?

A New Approach

Composite model UX

- Ability to model your perspective across processes

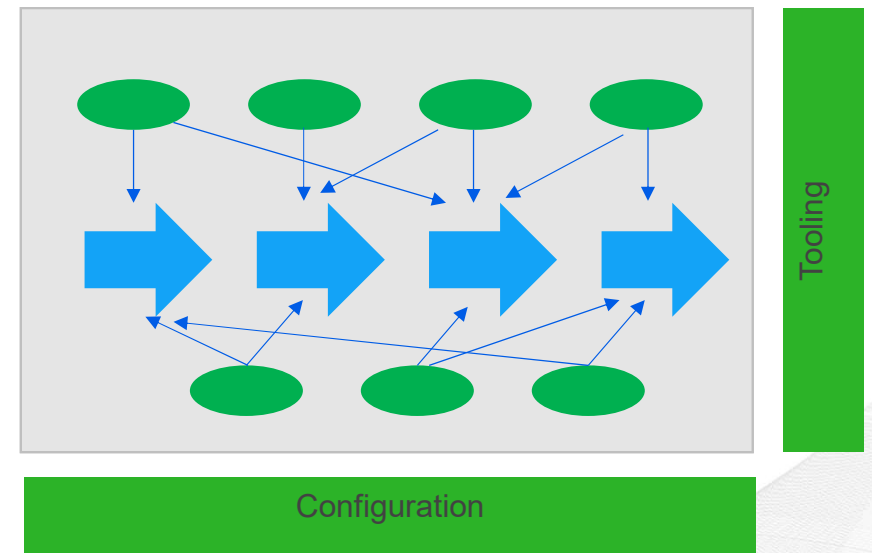

Existing solution examples

- Homepages, Widgets, H5 SDK etc.
- These concepts continues to be supported

New M3 UI is taking the composite model into the core

- Composite capabilities built into core UI
- Based on configuration decoupled from the business logic
- Embedded tooling for easy configuration

New and existing approach will co-exist

New M3 User Experience

HIGHLIGHTS

- New cloud architecture
- Stateless and decoupled
- Responsive design
- Role based processes across M3 functions
- Fully configurable down to field level
- Embedded UX design tooling
- Coexist with current H5 client
- Released process by process

Planned for June 2022

(pilots during spring)

Infor CloudSuites:

INDUSTRY SPECIFIC

Industry focused, pre-configured yet flexible, solutions based on Infor application suites, delivering industry leading business processes

READY-TO-GO CONTENT

Rich content to give a higher and more precise starting point and lower the cost of implementation

GROWS WITH YOUR BUSINESS

The Infor CloudSuites are built on a true cloud architecture that will scale with your business requirements and be fluid to handle the constant change of processes
