Avslutning

The collage features several screenshots from the Infor ION Grid administration interface. One screenshot shows the 'Admin Homepage' with various performance metrics and announcements. Another shows a 'Profile Information' window with details for 'FnF 407 M3 13.2 FNF-ION integration...'. A third screenshot shows a 'My Daily Work' dashboard with a list of tasks like 'My Purchase Orders' and 'Sales Monitors'. Overlaid on these are graphics including a chalkboard with the text 'personalize vs. modify' and 'build > execute', a 'SOFTWARE UPDATE' banner, and a 'redhat LINUX' logo. A large 'Update' button with a download icon is also visible.

# Infor Portal expected GA in April 2023

## IMPORTANT: Update to Infor Ming.le transition timeline

Published Wednesday, November 2, 2022 by Valerie Hayden

This is an update to the October 24 internal announcement regarding the release of Infor OS Portal.

In alignment with Infor's new semi-annual feature release schedule, **Infor OS Portal is expected to be announced as Generally Available (GA) in April 2023**, not December 19 2022, as previously communicated.

The application teams are currently working on Infor OS Portal adoption and have been asked to complete their Infor OS Portal certification by the end of the year. This will mark the point of readiness for Innovation Showcases, beta projects, and consulting/partner/support/sales enablement.

Infor OS Portal will replace Infor Ming.le and therefore during the GA announcement in April, we will also be announcing that **Infor will retire multi-tenant Infor Ming.le™, effective April 2024**. This date ensures that customers will be given a period of one (1) year to migrate to Infor OS Portal from the point of General Availability. The decommission scope for Infor Ming.le remains the same as previously communicated and will include Infor Ming.le Collaboration features Activity Feed, Share, and Groups as well as the associated Infor Ming.le APIs that are currently exposed via the API Gateway.

Infor OS Portal will only be released as a multi-tenant solution. Customers running Infor Ming.le single-tenant or "on-premises" will not be affected by this update. No SKU or license changes will be required.

Further details will be released via additional communications however, please direct any questions to Ryan Bavery at [ryan.bavery@infor.com](mailto:ryan.bavery@infor.com).

## ION

- ION Desk and ION API application name changes  
For ION Desk, the application name is changed to ION. For Infor ION API, the application name is changed to API Gateway. In ION Desk, these labels are changed:
  - In the dataflow modeler, workflow modeler, and API flow modeler, the ION API activity icon is renamed API.
  - The IMS via ION API connection point type is renamed IMS via API Gateway. ION API is renamed API.
- ION Connect: AnySQL Editor, Oracle and MS SQL  
You can now manually write an SQL query to use advanced features of SQL.

NCD - Ordering of inbound messages

Attachments (0) |  Linked KBs (0) |  Linked Incidents (0) |  Linked Defects (0) |  Sign Up |  Add to Favorites |

Description:

**Abstract:** You can now sequence custom documents (Extensibility 4) based on a first-in first-out or through a sequence number found in the payload. You can provide a static or a dynamic sequence ID to group similar messages together. You can use this functionality to order messages.

**Background:** Messages were only processed in the order they were sent to Infor Enterprise Collaborator (IEC). This process provided limitations to how messages were processed in relation to other similar messages such as processing messages in a defined sequence, or grouping messages with a common entity ID and processing them in sequence. Another limitation was that sending messages in DMS may not be in the correct order where in some cases ordered processing was preferred.

# Experiences

# Portals – issue resolution

## New capability for managing concerns and issues

- Designed for end-customer self-service
- Flexible solution and user interface without coding
- Targeting Zero end-user training needs
- External Users register their own “Issue”
- Automated flows to categorize and create corrective actions
- Follow up tasks and monitoring
- Built using the same technology platform as the Equipment Portal

## Value

- End user self service reduces internal effort
- Quick and efficient process captures information at source
- Easy to use and configure
- Flexible technology base

## Operation

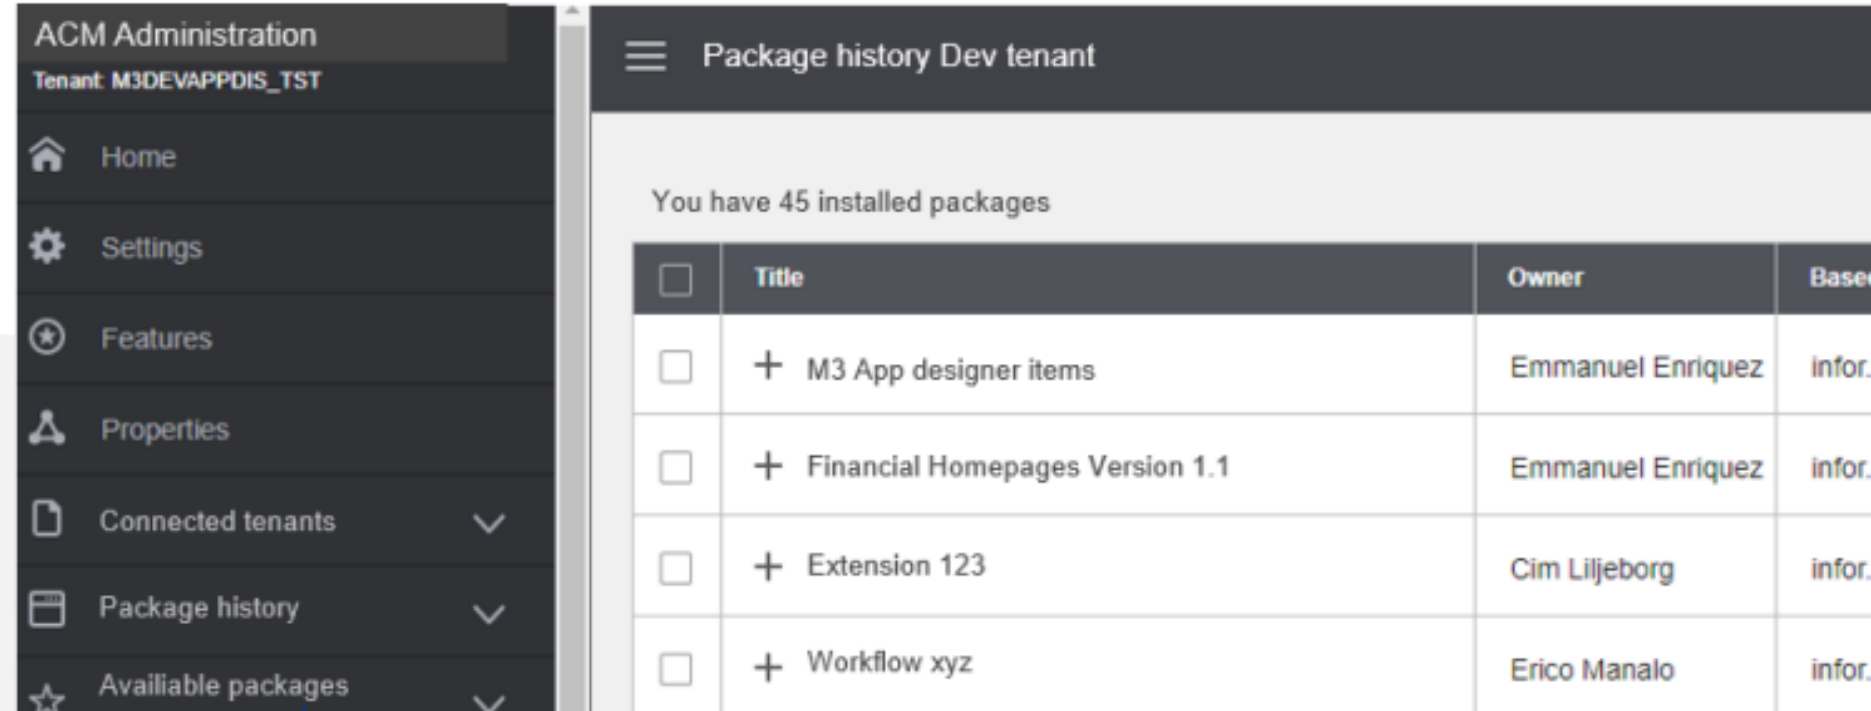

# Application Configuration Management

### Structured move of configurations and artifacts between tenants

ACM is designed to move configurations between tenants in a structured secure manor across the complete CloudSuite

#### Phase 1

- Infor OS: Configurations, security, extensions ec
- M3 framework: XtendM3, IPS, H5, personalizations, scripts, SDK applications
- M3 Business Engine Functions: 10+ functions
- M3 Business Engine Configuration: Custom list, security, roles, AdHov reporting, etc

### Value

- Structured handling of configurations
- Avoid errors from manual processes
- Lower cost of managing environments

## Infor OS Add-In for Microsoft Excel

Microsoft EXCEL Add-In for uploading and Downloading data from ION and Datalake

Overview Features Reviews Questions Policies and support Resources

## Infor OS Add-In for EXCEL

Infor OS Add-in for EXCEL from [Microsoft Store](#) lets the user upload the worksheet(s) data within the Excel spreadsheet into ION via IMS (ION V2 Messaging Service) or into the Infor Data Lake via Data Fabric Ingestion API. Users can also retrieve the data from Infor Data Lake into Excel Spreadsheet.

[Click Here](#) to redirect to Microsoft App Store to get the Add-In.

[Click Here](#) for Guided Walkthrough video

Click on the Download Now for Infor OS and ION API deliverables.

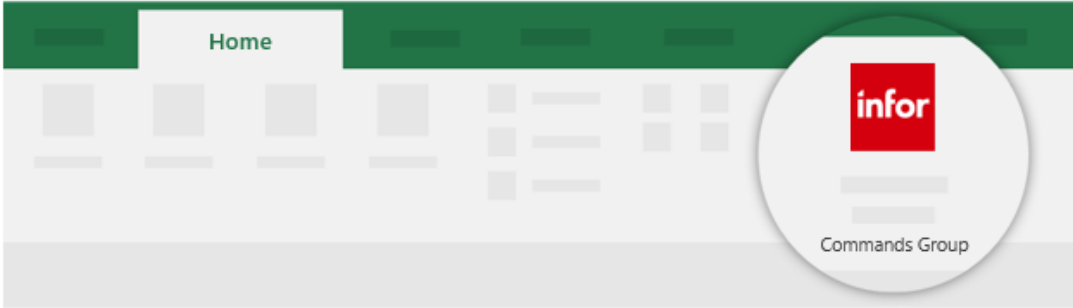

The screenshot shows the Microsoft App Store page for the 'Infor OS Add-In for Excel' application. The header includes the Microsoft logo, 'AppSource', and navigation links for 'Apps', 'Consulting Services', 'Industry Clouds', and 'Partners'. A search bar is visible. The main content area features the application's name, the Infor logo, and the developer 'Infor US LLC'. It indicates the app is for 'Excel' and has a rating of 5.0 (1 rating). The pricing is listed as 'Free', and there are buttons for 'Get it now' and 'Save'. Below the main card, there are tabs for 'Overview', 'Ratings + reviews', and 'Details + support'. The 'Overview' tab is selected, showing a description: 'This add-in can be used to send data into ION and also retrieve data from the Infor Data Lake. Excel Add-in for Infor OS lets the user to upload the data into either ION via IMS (ION V2 Messaging Service) or into Infor Datalake via Data Fabric APIs for the multiple sheets available within the Excel spreadsheet. Users must create an authorized app of Web App type and then use it to authenticate into the required tenant. Then they can utilize various features available in plugin to upload their data into IMS or into Infor Datalake and also to retrieve data from Infor Datalake. They can check for the instructions, responses or end results through a status sheet. The user can send data to IMS which can be further ingested into Infor Datalake or into ION which can be routed as per the Dataflow. Users can also retrieve data from Infor Datalake by giving a query. Note: This add-in is compatible with the cloud version of Infor OS. On-premise installations are not supported.' At the bottom, there is a section for 'Add-in capabilities' with two bullet points: 'Can read and make changes to your document' and 'Can send data over the internet'.

Infor OS Add-In for Excel - [https://excel-addin-prd.azurewebsites.net/instructions?\\_host\\_Info=Excel\\$Win32\\$16.01\\$en-US\\$telemetry\\$isDialog\\$\\$16](https://excel-addin-prd.azurewebsites.net/instructions?_host_Info=Excel$Win32$16.01$en-US$telemetry$isDialog$$16)

2. How do I add more than one profile?

- Adding additional profiles is the same process as mentioned in step 1.

3. How do I switch between profiles?

- Click on Authenticate Button , a pop up opens having a list of already existing authorized app files.
- Click on desired file from the list displayed to sign in into the selected tenant.
- Once user is authenticated, window auto-closes and the "Authenticate" button turns into Green Color.

4. Can I have multiple active profiles at any given time?

- No. Although users can enter multiple profiles, only one profile can be active at a time.

5. What functions does this Add-In provide?

- "To IMS" – This option is used to send the data from the excel sheet (either a selected sheet or All the sheets in the Excel workbook) will be sent into ION through IMS(Infor Messaging Service). While using "To IMS" option , user will have to enter the Logical ID of the active connection point being used (More details on this can be found from the User Guide). After entering the Logical ID , user can select either a single sheet or "ALL" to send all the sheets into IMS. Once both these fields are filled user can click on "Submit". Once the Data has been sent one can see a display on the Add-In and also check for more details in the "Sheet\_Overview" sheet.
- "To Data Lake" – This option is used to send the data from the excel sheet (either a selected sheet or All the sheets in the Excel workbook) will be sent into ION Data Lake. While using "To Data Lake" option , user will have to enter the Logical ID of a connection point being used (More details on this can be found from the User Guide). After entering the Logical ID , user can select either a single sheet or "ALL" to send all the sheets into IMS. Once both these fields are filled user can click on "Submit". Once the Data has been sent ,user can see a display on the Add-In and also check "Sheet\_Overview" sheet for more details .
- "From Data Lake" – This option is used to extract the data from Data Lake into the currently opened Excel sheet . While using "From Data Lake" one has to enter the query in the text box provided and also enter the name of the sheet which stores the retrieved data . (Please make sure that the name of the sheet shouldn't be the same as the existing sheet in the workbook and also the name of the sheet entered should be less than 31 characters).
- Note - When you are sending data through 'To IMS' or 'To Data Lake' option and if the object schema is of type JSON or NDJSON, the data is converted from CSV to JSON or CSV to NDJSON respectively. If the object schema has any other data type, it is sent as CSV only.

6. Why is a new Sheet called "Sheet\_Overview" being added when we load the Add-In ?

- Sheet\_Overview is a new sheet being added by the Add-In to display various logs being generated during the working of the Add-In. User can go through the Sheet\_Overview to know the status of the tasks they have performed using the Add-In.

7. When sending data to ION what happens to the data?

- If the option selected is 'To IMS' and the required configuration is done, then the sheet data is converted to the target schema's respective format (CSV, JSON, NDJSON). Subsequently, the IMS API is called after which the data goes into ION. Further processing of the data can be done using a Document Flow or a Data Lake Flow. For Example: The sheet data can be pushed into the Infor Data Lake by creating a Data Lake Flow.

Infor OS Add-In for Excel

This add-in can be used to send data into IMS and also retrieve data from the Infor Data Lake.

# Dagens ämnen

Lite smått och gott runt M3 Cloud Edition

Go Live med Lantmännen Maskin

Introduktion till BaaS

Avslutning

The collage features several screenshots from the Infor ION Grid administration interface. One screenshot shows the 'Admin Homepage' with various performance and traffic metrics. Another shows a 'Profile Inform...' window with details for 'FnF 407 M3 13.2 FNF-ION integration...'. A third screenshot shows a 'My Daily Work - CC' dashboard with a 'My Menu' and 'Sales Monitors' section. Overlaid on these are graphics including a chalkboard with the text 'personalize vs. modify' and 'build > execute', a bar chart with the text 'SOFTWARE UPDATE', a cloud icon, and a keyboard key with the word 'Update' and a download icon. At the bottom right, there are logos for 'redhat LINUX' and 'stgreSQL'.

# För ett livskraftigt lantbruk nu och i framtiden

På Lantmännen Lantbruk och Maskin tillhandahåller vi marknadens främsta och mest högkvalitativa produkter och tjänster för svenska lantbrukare.

# Lantmännen Maskin

Affärsenhet inom division Lantmännen Lantbruk

Omsättning 4 miljarder SEK

+ 50 anläggningar i Sverige som omfattar både butik, verkstad och maskinförsäljning

Huvudkontor, Centrallager och 3PL för Agco i Malmö

750 anställda varav ca 700 användare i M3

Ca 1,3 miljoner artiklar i MITMAS, ca 9 miljoner artiklar i sortimentet

Denna Jira-kanban visade alla utvecklingspunkter. Nu ligger alla installerade och därför i status Installed längst till höger. Här kunde vi snabbt sortera fram typ, area, storlek och status på de 284 punkter vi arbetade med. I veckomöten följde vi upp progress och planerade för installation etc.

The screenshot shows the Jira Kanban board for the MAX 2.0 project. The board is organized into columns representing different stages of development: DES-020 ONGOING (0 of 6), DEVELOPMENT (0 of 4), INSTALLATION PR... (0 of 4), REDESIGN (0), BUSINESS VALIDA... (0 of 6), IPD REVIEW (0), READY FOR UAT (0 of 23), and INSTALLED IN P... (2 of 284). The board includes a search bar, a list of filters (e.g., Only Major, Only H5 SDK), and a sidebar with navigation options (e.g., Roadmap, Backlog, Kanban board, Reports). The board also shows two issues: Elin Asker (1 issue) and Ola Bramstorp (1 issue). The board is currently sorted by 'Only H5 SDK'.

# ReQtest användes av slutanvändarna som testade lösningen vid fyra testperioder. Ärendena kom även in i Jira där vi hade en Incident-kanban

The screenshot displays the ReQtest application interface. At the top, there is a navigation bar with the ReQtest logo on the left and menu items: Requirements, Tests, Bugs (highlighted), Agile Board, Reports, Administration, Contacts, and Help. On the right side of the navigation bar, there is a user profile icon labeled 'LM Maskin' and a dropdown arrow.

Below the navigation bar, there is a search bar containing the text 'ALLA aktiva buggar\*' and a dropdown arrow. To the right of the search bar are several icons: a gear, a magnifying glass, and a blue arrow. Below the search bar, there is a text prompt: 'Drag a column and drop it here to group by that column'.

The main content area is a table with the following columns: ID, Problem, Status, Gradering, Ansvarig, Problemområde, M3 program, Process, Bifogad bild, Referens nr., and Problem beskriv. The table contains 12 rows of data, each representing a bug report. Each row starts with a checkbox and a magnifying glass icon. The status column shows various states like '1. Felsökning pågår', '5. Utveckling pågår', and '4. Test ej OK'. The 'Gradering' column shows severity levels like 'C. Moderate', 'A. Critical', and 'B. Major'. The 'Referens nr.' column contains links to external systems like Jira and farmd.

At the bottom right of the table, there is a pagination control: 'Go to page: 1 Show rows: 20 1-20 of 157' with navigation arrows.

At the bottom left of the page, there is a copyright notice: '© 2023 ReQtest. All Rights Reserved.' At the bottom right, there is a green circular button with a white plus sign.

## Före och efter

The screenshot shows a SAP Fiori dashboard for purchase orders. The layout includes several widgets:

- Dagliga M3 uppgifter:** A list of tasks with icons, including 'Artikelunderhåll Heavy', 'IO-förslag maskup', 'IY5800 Inköpsorder. Skriv ut dokument', 'MMS080 Materialplan', 'IY5200 Inköpsorder', 'IY5250 Inköpsorder. Bekräfta', 'Restnoteringar', 'IY5220 Orderbevakning IO', 'Öppen IO - Fakturerad ej mottagen', 'MMS100 Hakt/Datorder', 'OIS100 Kundorder', 'MWS070 Lagertransaktioner', 'APS110 Leverantörfaktura', 'HTL 1694', and 'IY5040 GRTMOrderlyp <-> blank'.
- Minna öppna inköpsordrar:** A list of open purchase orders with status indicators (1-Åkt, 2-Suppliment, 3-Lager, 4-Säkring).
- Minna inköpsordrar med avvikelser:** A list of purchase orders with deviations, including 'Inköpsorder redo för utskrift (Status 15)', 'Obekräftad inköpsorderlinje (Status 20)', 'Bekräftad inköpsorderlinje med avvikelser (Status 30-34)', and 'Bekräftad leveransdatum passerat för inköpsorderlinje'.
- Anteckningar:** A section for notes with a placeholder 'Feel free to write your own notes here...'. Below it, a message states 'Inga arbetsföden är tillgängliga'.
- Inköpsorderlinjer AGCO - låg status:** A list of AGCO purchase order lines with status indicators (Ej utskrivna (Status 15, skapat igår) and Obekräftade (Status 20, skapat idag)).
- Inkommande ersättning:** A form for entering incoming payment with fields for 'Orderkategori', 'Ordernummer', 'Radnummer', and 'Sufix'. Below the form is a table with columns: 'Bläck', 'Orderfac', 'Ordernummer', 'Rad', 'Artid', 'Facile', 'Le', 'Status', 'Plan.datum'. A message below the table says 'Inga data är tillgängliga'.
- Arbetsfödesvisning:** A section for work order display with a message: 'Välj ett objekt i widggen Uppgiftslista, Meddelandelista eller Starta arbetsföden om du vill visa innehåll här.'

# Dagens ämnen

Lite smått och gott runt M3 Cloud Edition

Go Live med Lantmännen Maskin

Introduktion till BaaS

Avslutning

The collage features several screenshots from the Infor ION Grid administration interface. One screenshot shows the 'Admin Homepage' with various performance and traffic metrics. Another shows a 'Profile Inform...' window with details for 'FnF 407 M3 13.2 FNF-ION integratio...'. A third screenshot shows a 'My Daily Work - CC' dashboard with a 'My Menu' and 'Sales Monitors' section. Overlaid on these are graphics including a chalkboard with the text 'personalize vs. modify' and 'build > execute', a bar chart with the text 'SOFTWARE UPDATE', a cloud icon, and a keyboard key with the word 'Update'. Logos for 'redhat LINUX' and 'stgreSQL' are also visible.

# Backend as a Service

**BaaS is a customer managed extension tool, where customers will be building tenant specific API extensions.**

**FaaS exposed as BaaS – i.e., Event driven Functions as APIs**

**Cloud Native – Serverless, scalable Architecture**

**Developer's tool/ Provides APIs and SDKs for your solution**

**Cloud Agnostic – Build your API once; Run in AWS/ Azure/ ...**

# What you get?

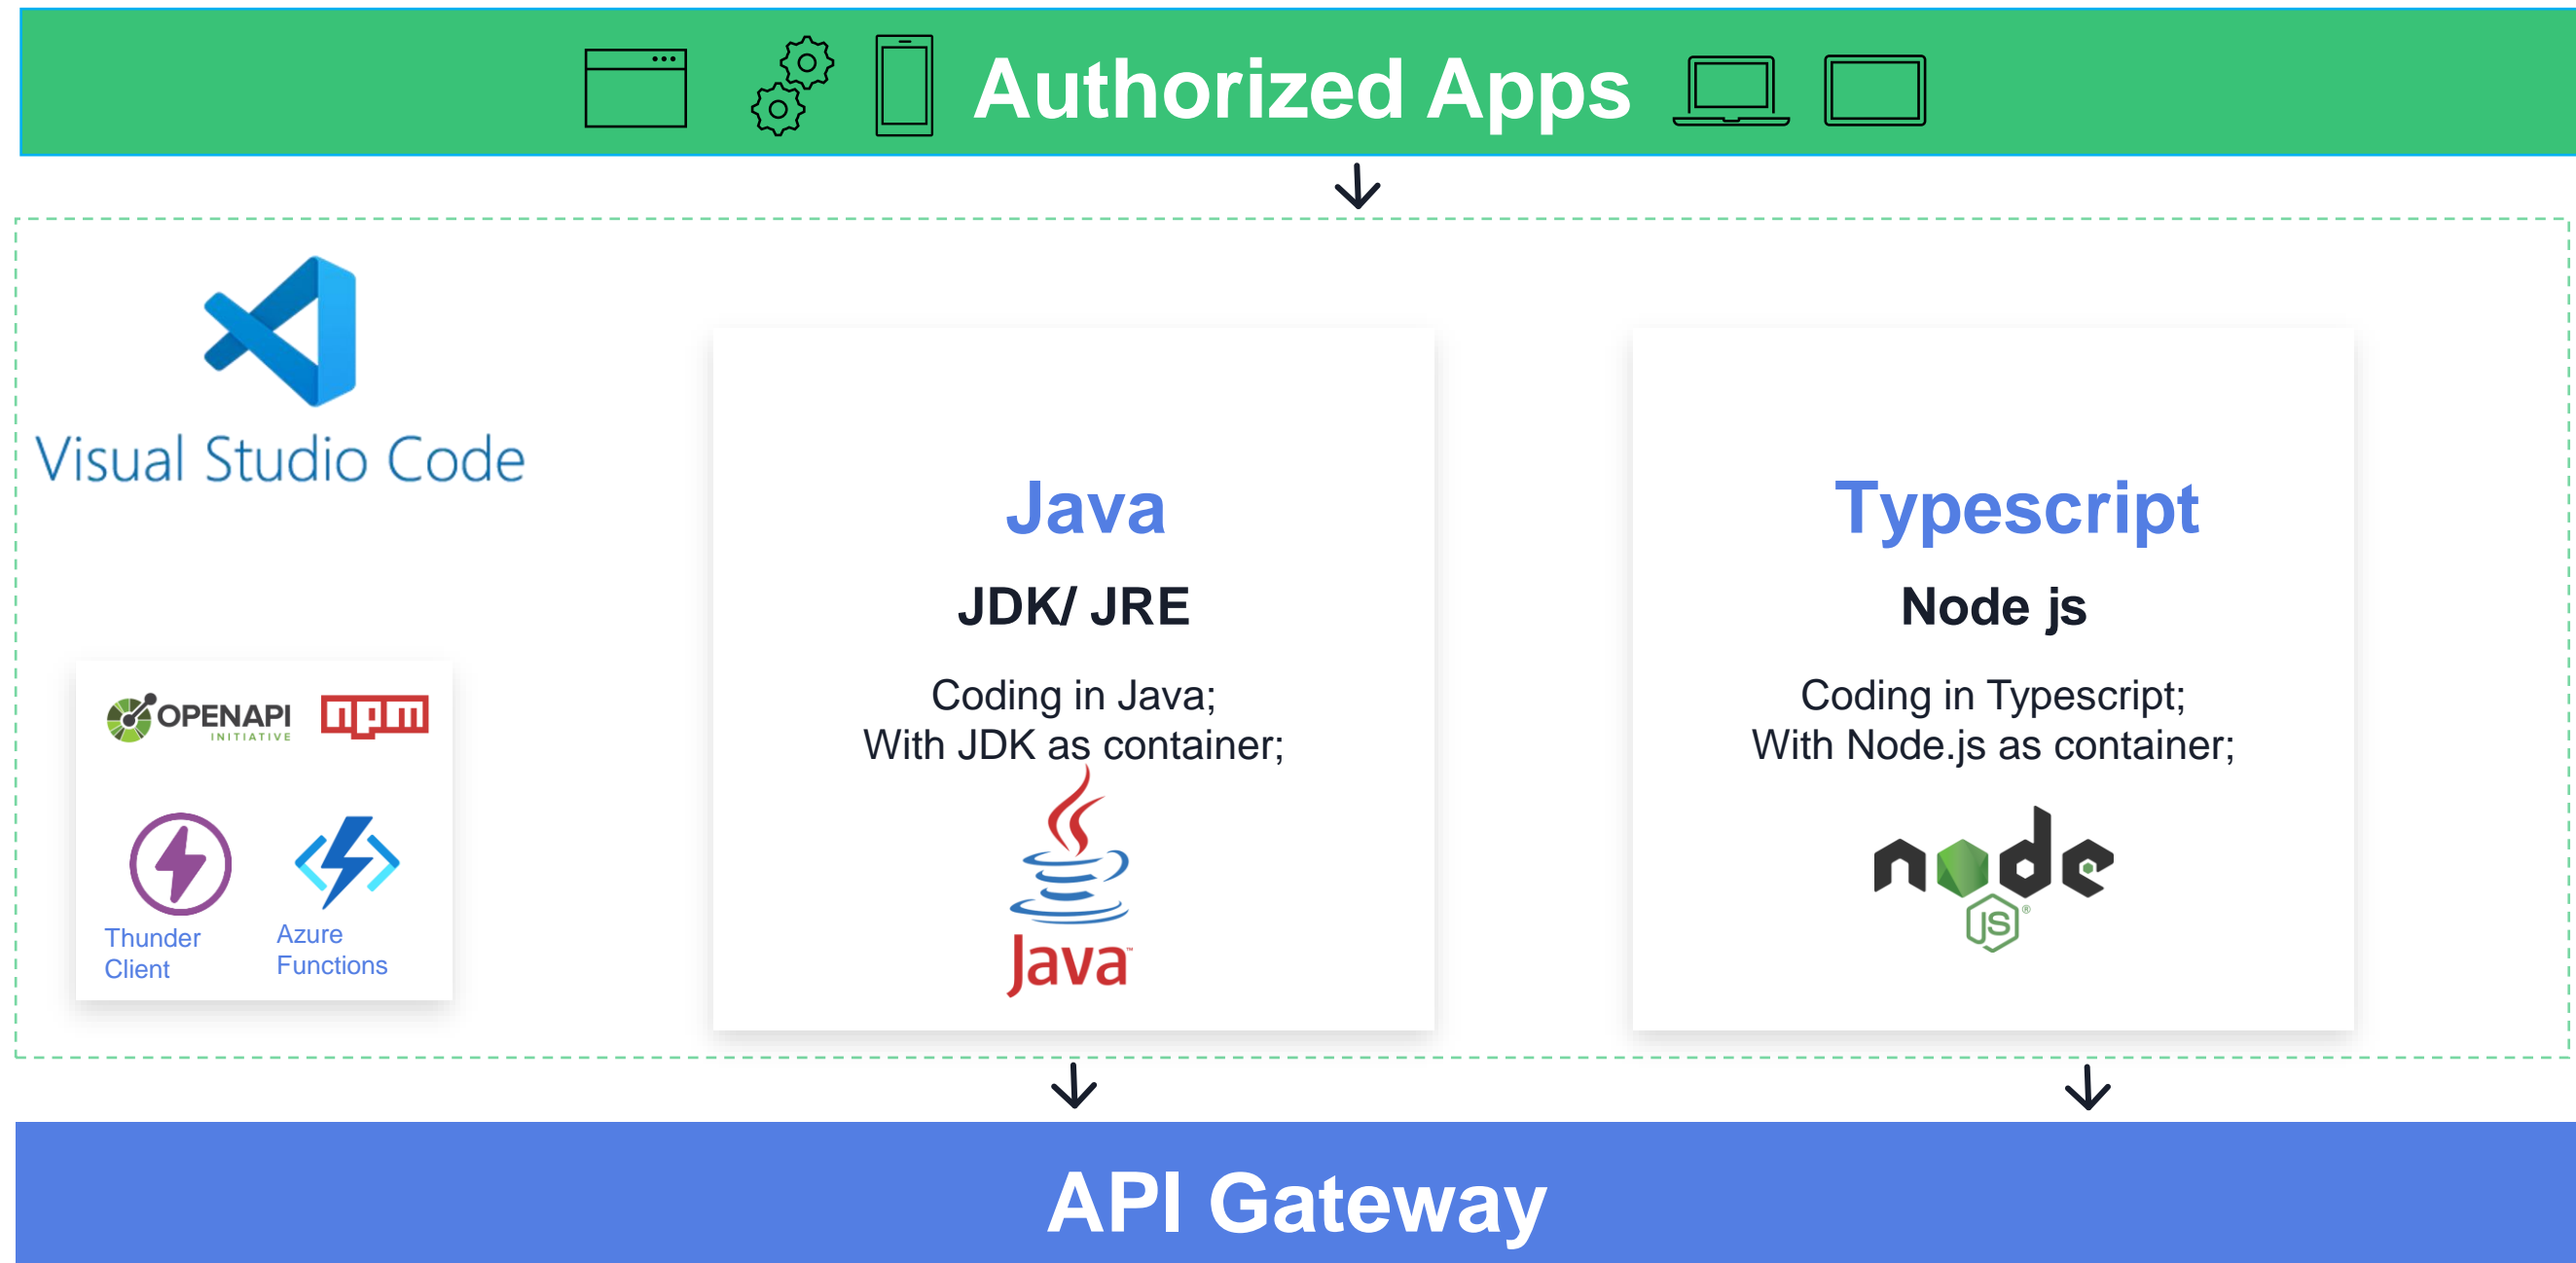

- ✓ **Managed Storage**
- ✓ **Managed Compute capacity**
- ✓ **Managed Security**
- ✓ **Managed Execution (Event driven/ Schedule Driven)**

**Customers to manage development, deployment.  
Support and maintenance of deployed services stays with customer.**

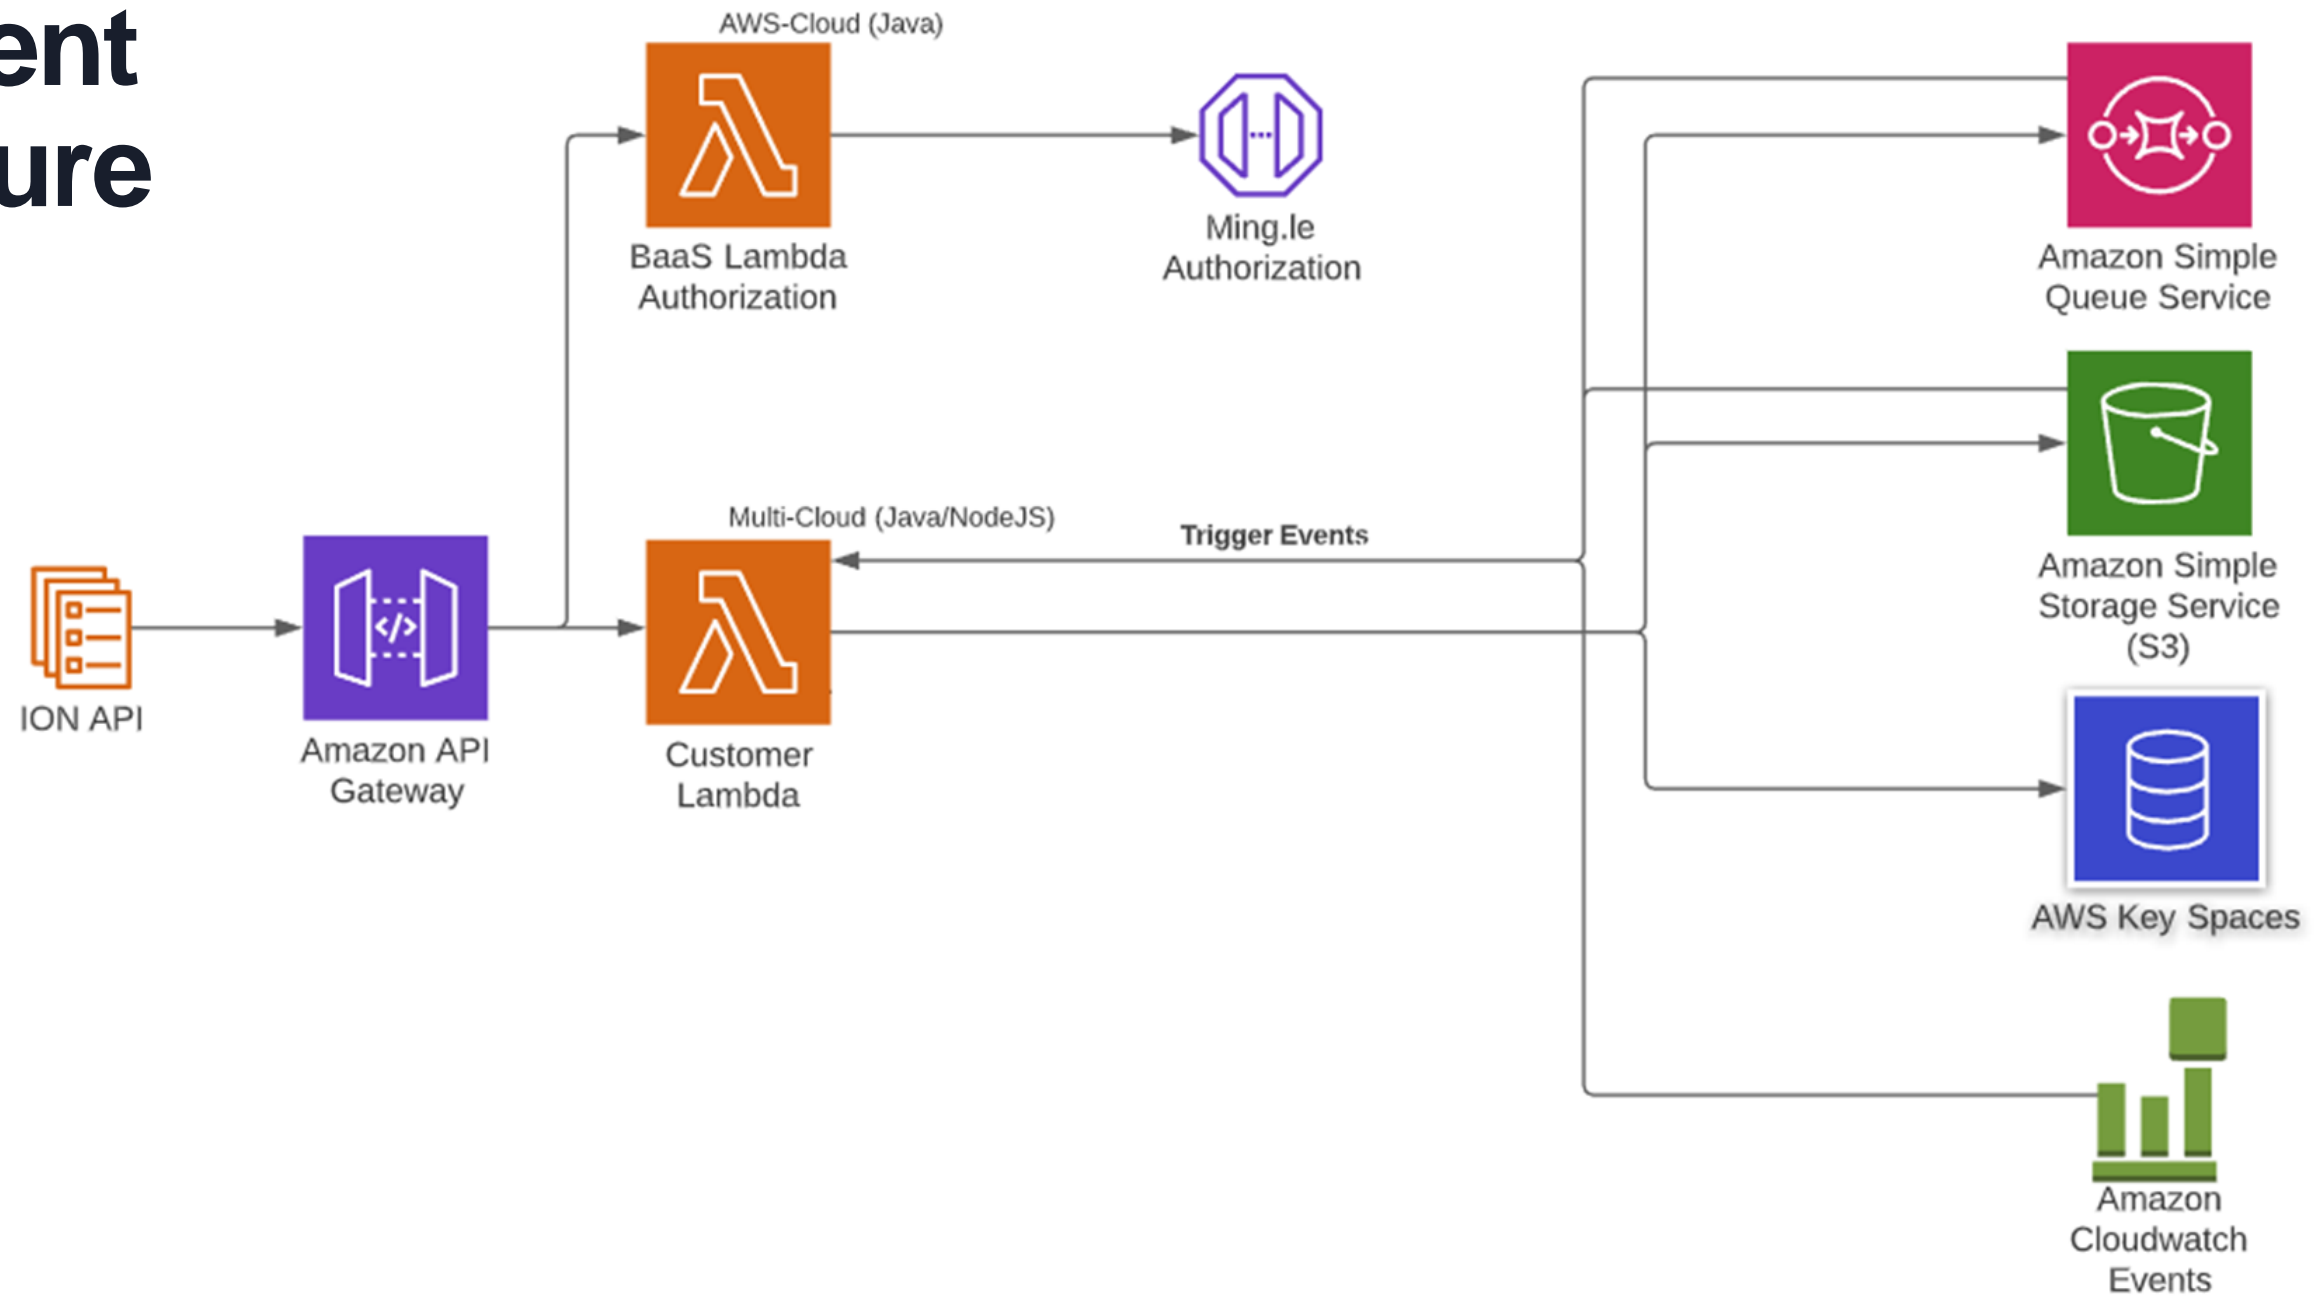

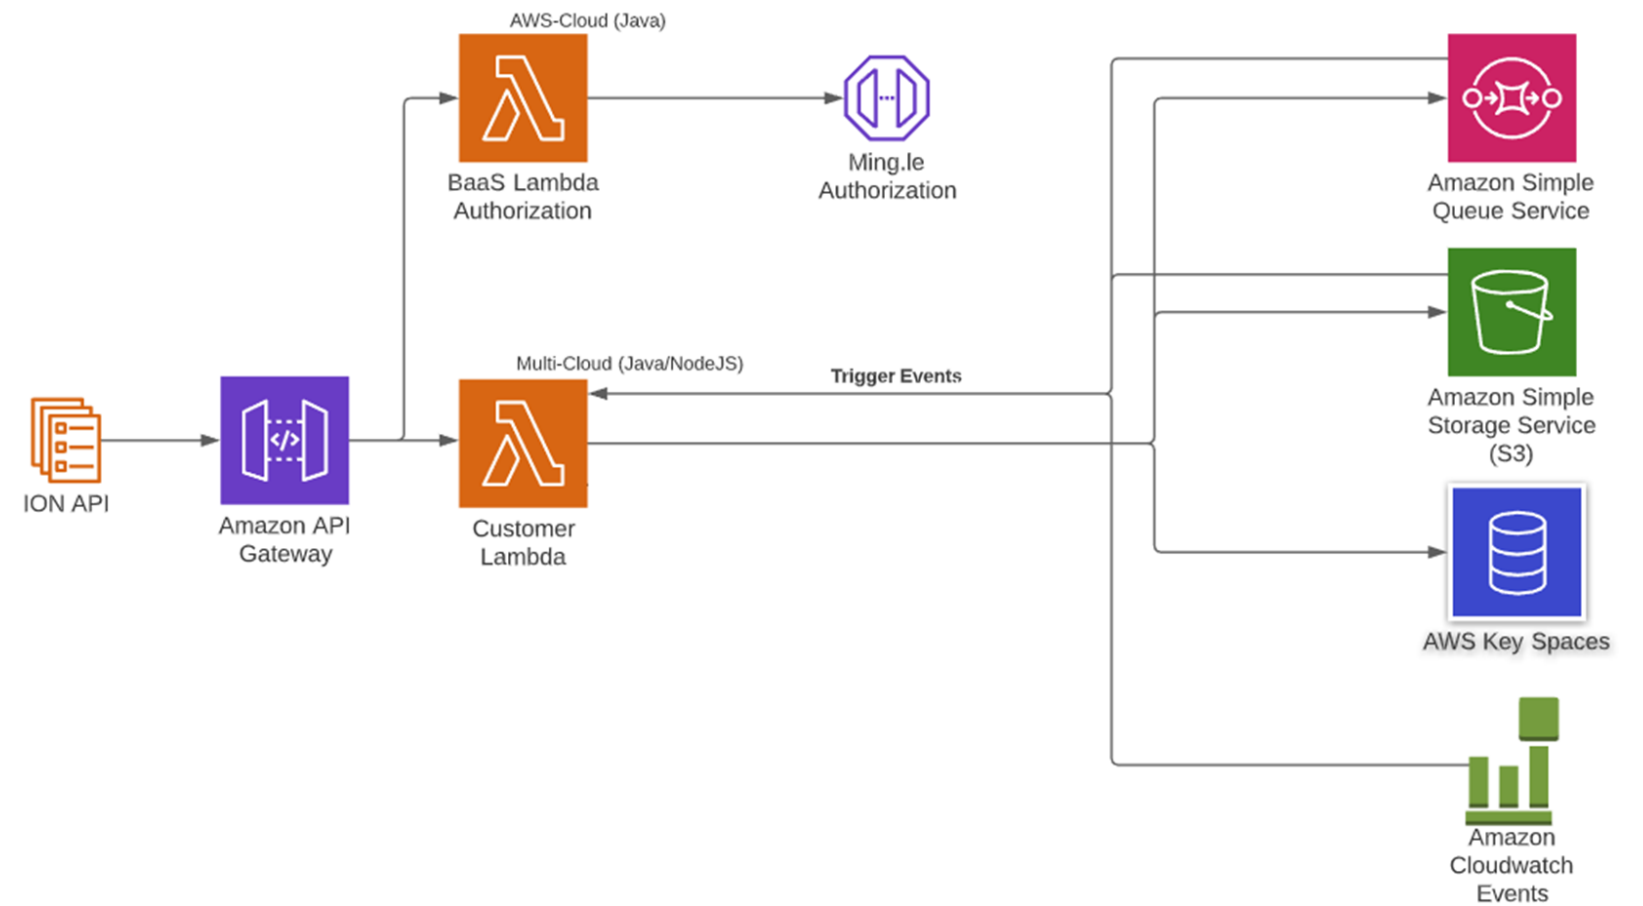

# Development Architecture

# Deployment Architecture

# Deployment Architecture

**Compute Only API** – API Lifecycle for compute only API

**API (Compute + KeyValue storage)** – API Lifecycle for APIs with KeyValue storage (data model management)

**API (Compute + S3 storage)** – API Lifecycle for APIs with S3 storage

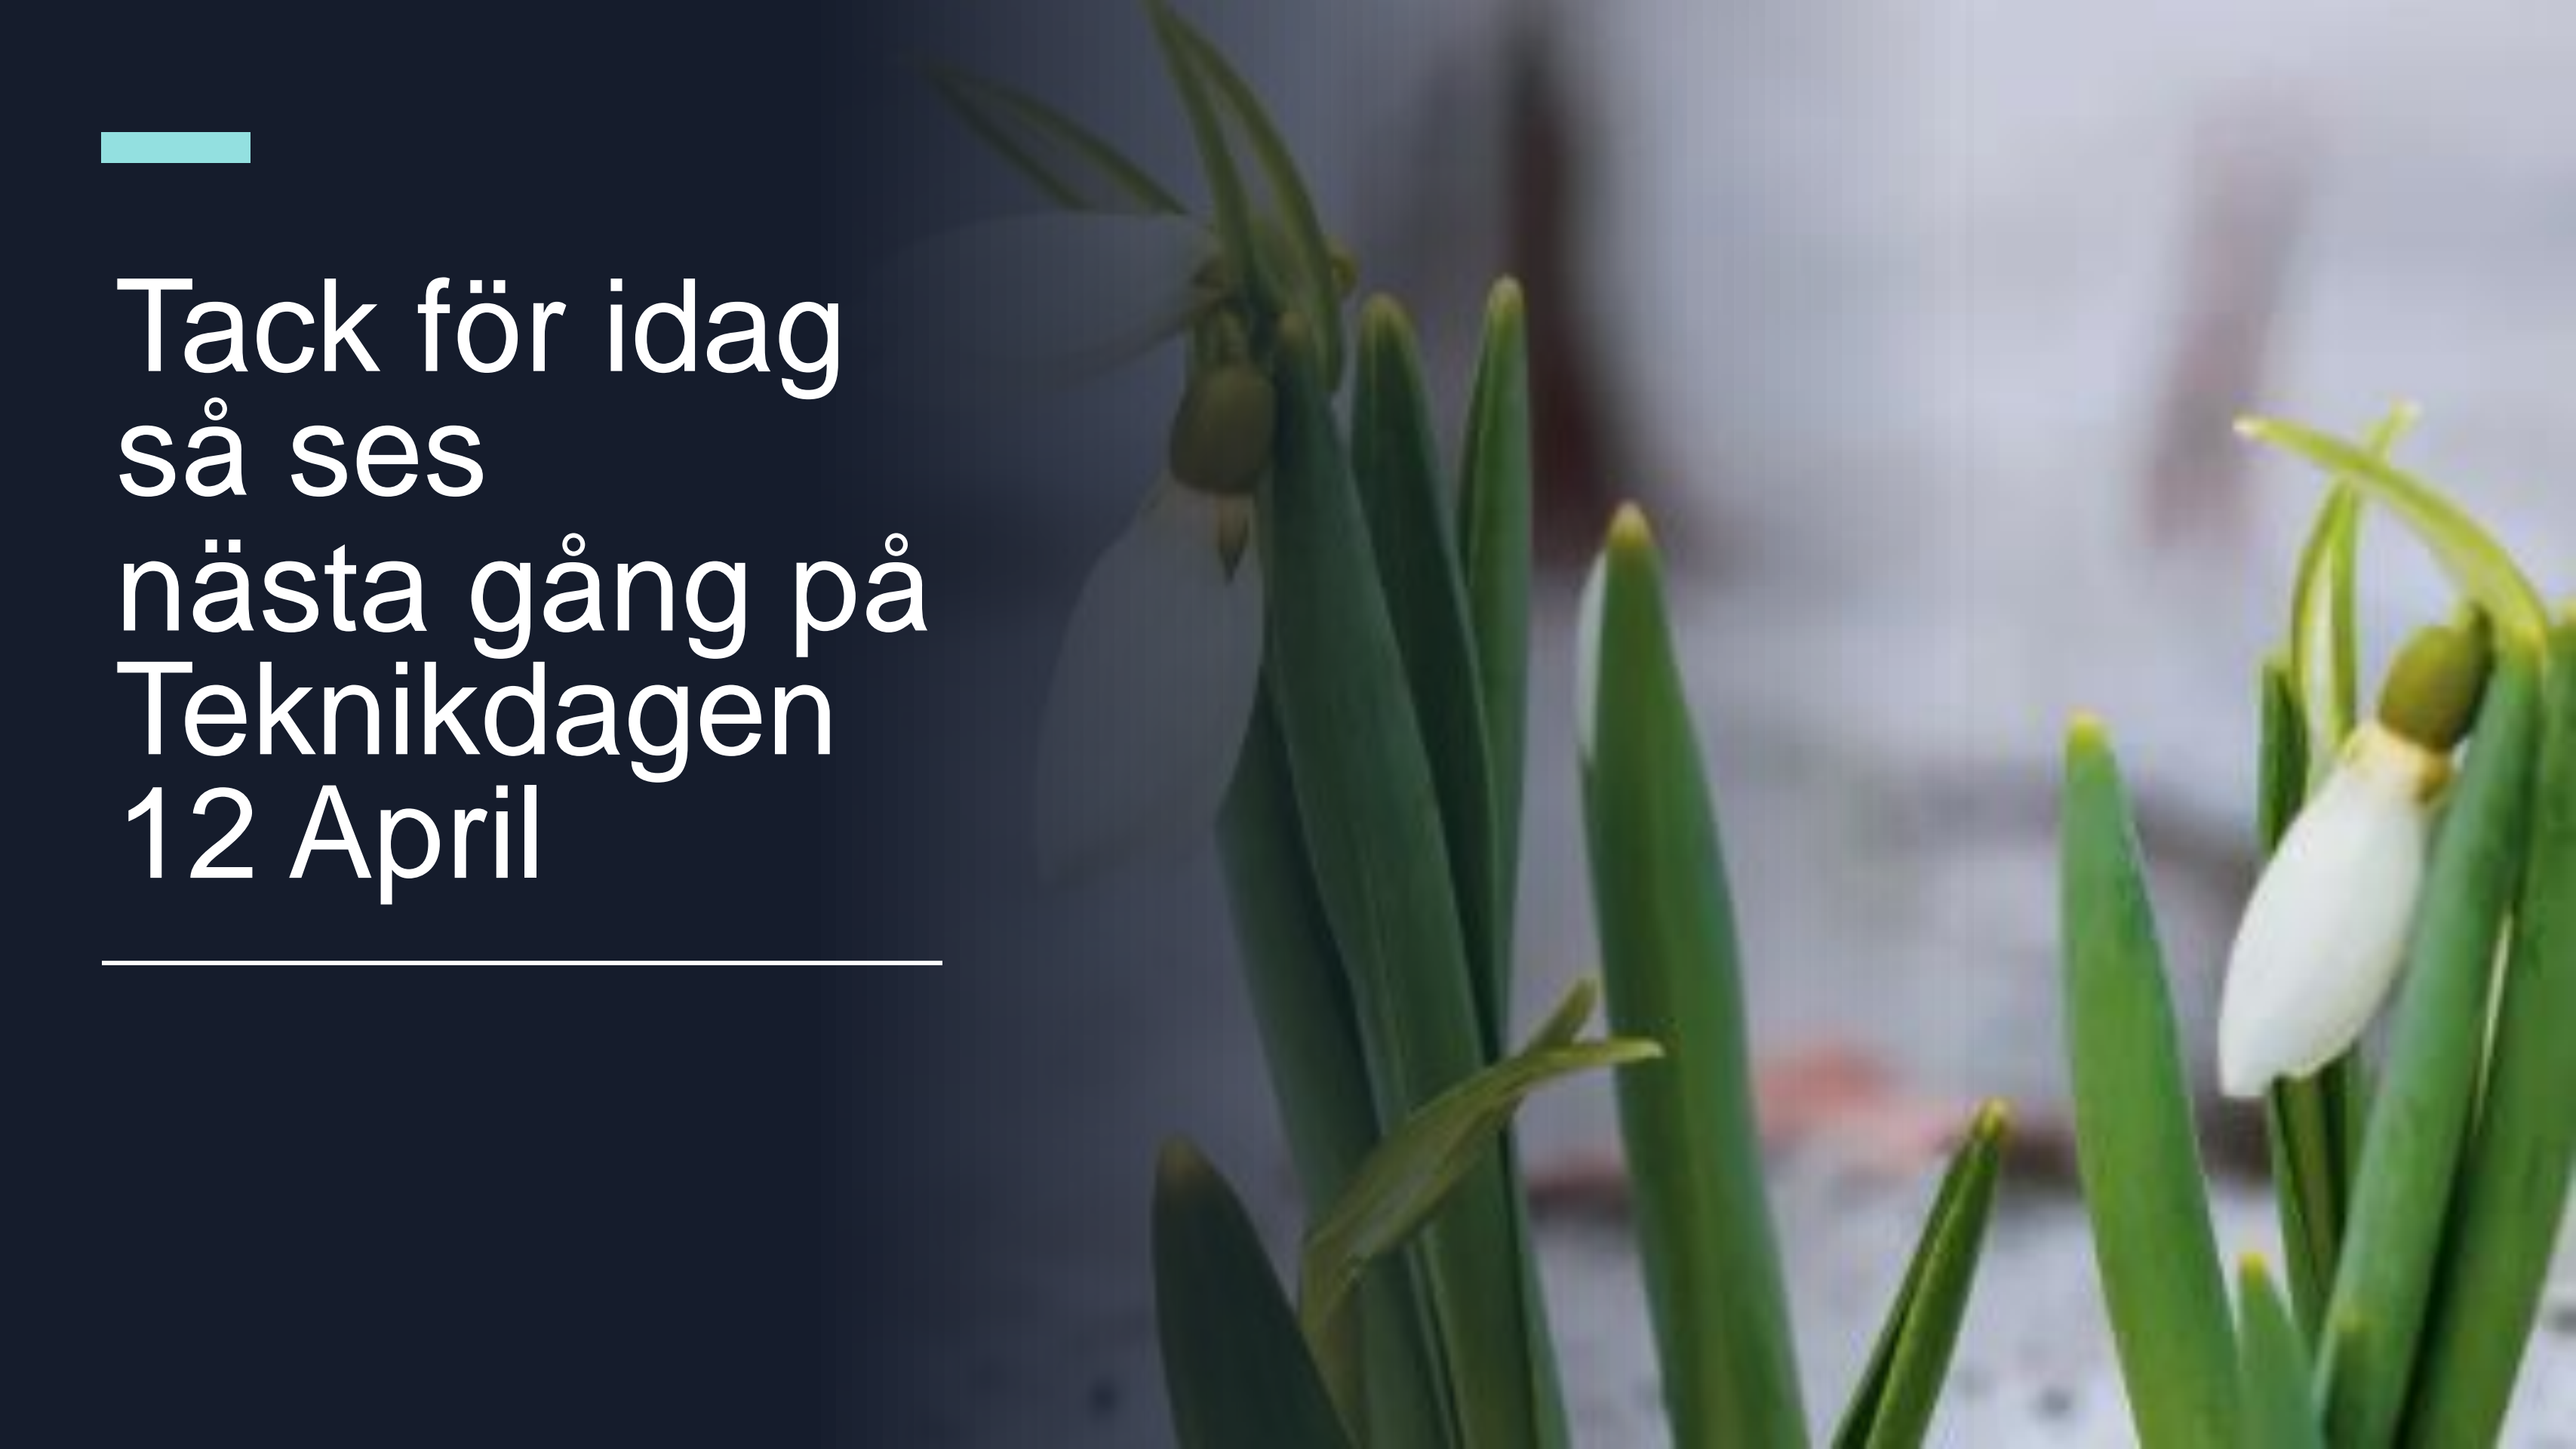

**API (Compute + IONAPI)** – API Lifecycle for APIs using IONAPI to communicate with other services.

**API** – Combination of all of the above.

# Skill Set required

- General Programming Knowledge
- Java/ Typescript (NodeJS)
- API Domain knowledge
  - HTTP
  - REST
  - Open API (Swagger)
  - API Clients (Thunder, Postman)
  - SSL
- Source control/ CI – CD knowledge

Tack för idag  
så ses  
nästa gång på  
Teknikdagen  
12 April
