What are we working on

Disclaimer

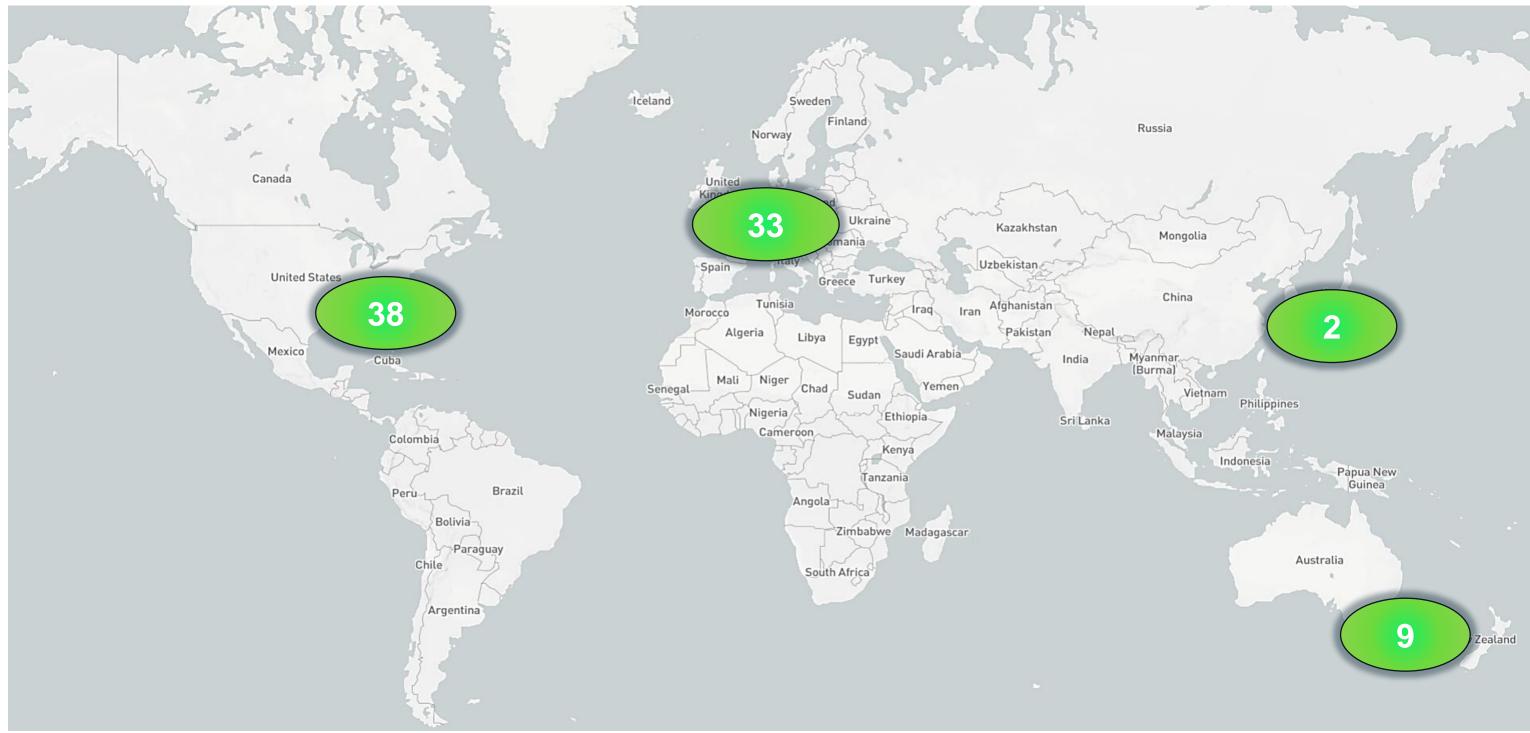

This course provides net-change training content for enhancements delivered in this release. The expectation is that participants have sufficient knowledge of the solution prior to participation in any release training. Release training is not offered for all enhancements. In the event Infor determines, in its sole discretion, not to offer release training for a particular enhancement, there should be sufficient content within the applicable Release Notes and other documentation provided with the release to provide an explanation of the change in the solution regarding such enhancement. Infor does not offer release training for maintenance updates. In addition, the training offered in this course is not intended to be a complete presentation of all problems and issues that may arise in connection with any enhancement. It is also generic and may not be accurate for all. Infor therefore makes no guarantees, or assumes any responsibility for the correctness, sufficiency or completeness of the material presented.

All business entity names, characteristics, products and other data portrayed in this production are fictitious. No identification with actual business entities, names, characteristics, products or other data is intended or should be inferred.

No part of this course may be reproduced or transmitted in any form or by any means electronic or mechanical, without the prior written consent of Infor.

ICA Sverige at a glance

ICA Gruppen's operations are broken down into

ICA Sverige Rimi Baltic Apotek Hjärtat ICA Fastigheter ICA Banken

ÍCA Sverige Net Sales 2022, MSEK

* Transferred to FTE

Close to **9**000 Employees* in ICA Sverige

About 50 000 People work in the retailer-owned ICA stores

The Industry Cloud Company

Expect better outcome in Cloud

Industry focus Up to date Rich of industry specific Evergreen solution with capabilities and content: industry specific updates: Last mile functionality State of the art security and technology • Preconfigured end-to-end Continuously improved solution business performance Prescriptive implementation ٠ New functionality injected Industry documentation silently into the cloud

Agile

A DNA of speed and agility:

- A fluid solution adopting to everchanging business requirements
- Enabling customers to be disruptive and agile
- Support for new and changing operating models

Operate

infor

Innovation

Cloud technology platform enabling differentiation and innovation

- Strong decision support
- Automation capabilities (ML/RPA/PI)
- Business optimization
- No/low/full code development capabilities

Differentiate

77

We as Nutreco are able to deliver a digital solution for our business, by leveraging from the proven state of the art technology, which is taken care of by Infor and focus on delivering the value"

Erik Beckers, CIO of Nutreco

77

In distribution, we are highly dependent on technology. Previously, it was hard to scale as fast as we needed when we had a sudden growth spike. But now with our multi-tenant cloud solution, we are ready to scale and go."

Andrew Bennett, CEO, Vallen Asia

77

infor

We can stay ahead of our competitors through being **more agile** in responding to new trends, collaborating on a new idea and launching these on the shop floor quickly because our processes are being more efficient today."

Nina Hjalmarsson, Supply Chain Director/CIO Kiviks Musteri

77

As our business rapidly expands, APP Group needs to have a modernized IT foundation to grow and scale effectively. Our investment in Infor's ERP and supply chain solutions will help **provide the transformation** our organization needs to drive agility, improve our time to market for new products and expand globally." Donna Lisk, Chief Financial Officer, APP Group

77

In meeting the needs of our market, it's imperative that we have the agility to be able to respond quickly to trends in order to capitalise on new opportunities, and ultimately maximise sales."

Per Svensson, IT Director Cloetta

77

Infor's cloud solution will help unify all aspects of our business by providing integrated workflows and full visibility across the organization to more efficiently and proactively service our customers." Kim Cordell, VP of Information Technology at Wajax

Beyond applications **Dilemma for CIOs**

Key challenges

Complexity and cost with multiple vendors

Need to maintain different skillsets

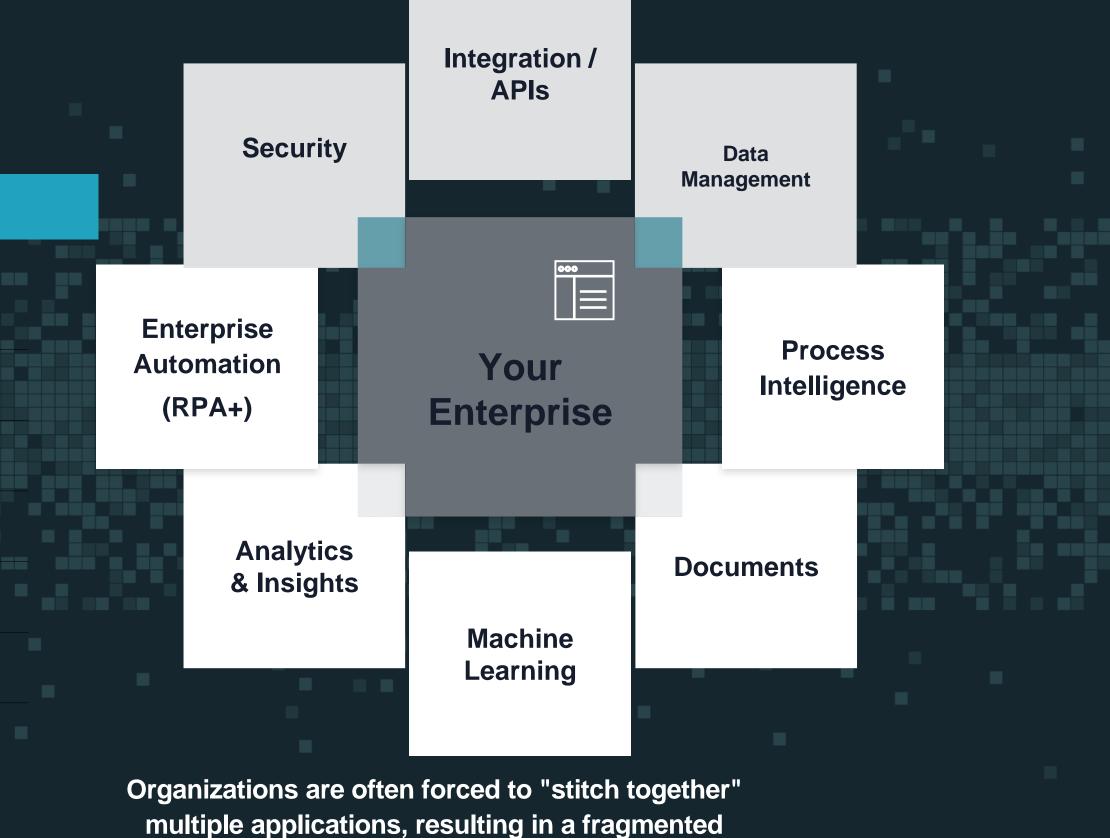

"Forever" integration & maintenance work

Dealing with multiple clouds

Security challenges

Fragmented user experience

and fragile enterprise architecture

Automation / Intelligence / **Productive**

M3 Experience Designer

Creating a tailor made M3 user experience

Any industry, any process, any user

M3 Experience Designer is a tool, not a one-off application. We support all our focus industries, any customer process, any user.

Our users

infor

- M3 Development, building new standard applications
- Services organization and partners
- Customers IT, development resources, power users ٠
- Application end users •

Integrated part of the standard M3 user interface

Customer get, not only the customizable standard user tailor made applications for their specific needs.

interface, but also a fully integrated toolset that let them build

M3 Experience Designer

"The Experience designer is intuitive and easy to use. We have moved from developing applications to configuring them!

Our users are happy with the applications we have created so far, now we can bring information from different areas into one screen / application."

"Experience designer är helt rätt väg för framtiden. Innan det började pratas om detta så såg jag stora utmaningar på detta området eftersom vi haft våra mashups, och skulle de behövts ersättas med SDK som kräver programmerare"

UX Direction

Enabling hyper-productivity for the end user

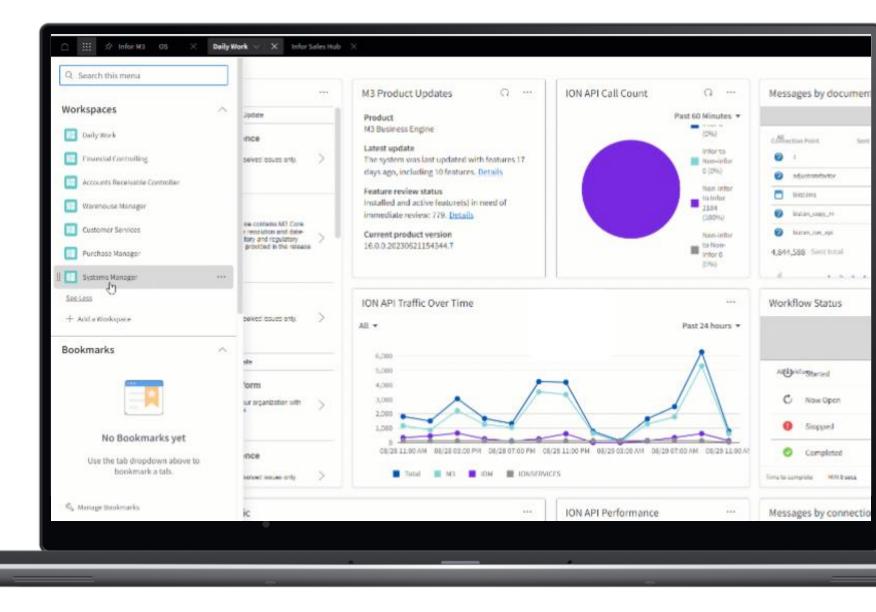

Improved CloudSuite navigation

 Users can now navigate between applications, workspaces etc more easily using the OS Portal. Select applications via the menu and jump between open applications, workspaces etc via tabs

Configurable Workspaces

 Users can leverage robust Workspaces configurability options, so they have the ideal place to start and end their day in their Infor CloudSuite

Enabling hyper-productivity for the end user

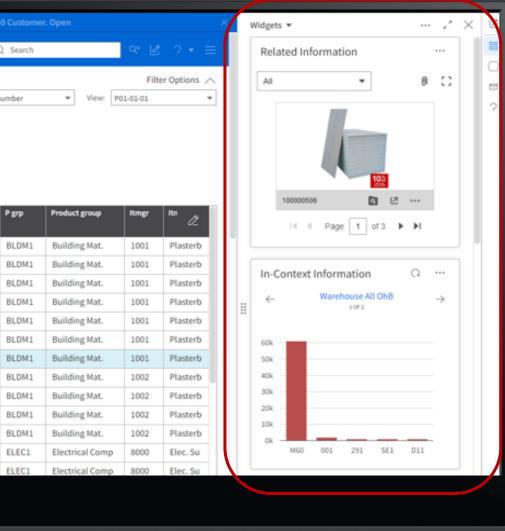

Expanded contextual capabilities with Smart Panel

• Users can take advantage of expanded contextual capabilities, so widgets and Workspaces feel dynamic and specific to them

Platform **New widgets for Open Al ChatGPT integration**

Two new widgets are published that provides users with an initial integration with ChatGPT.

- An in-context widget for Business Partner Review is that helps render instant insights using ChatGPT.
- 'Ask ChatGPT' widget that can pull information on any business context data using a custom prompt.

The AI Evolution

Prescriptive & Predictive AI

Deep learning models with supervised and unsupervised learning that produce prescriptive and predictive outcomes

Automated machine learning is applying the ML models to solve real-world problems using automation.

Neural networks

Type of ML process that teaches computers to process data like a human brain

Α

Simulation of human intelligence by machines and computer systems

Machine Learning

Branch of AI where machines learn like humans using data and algorithms, gradually improving its accuracy

Generative Al

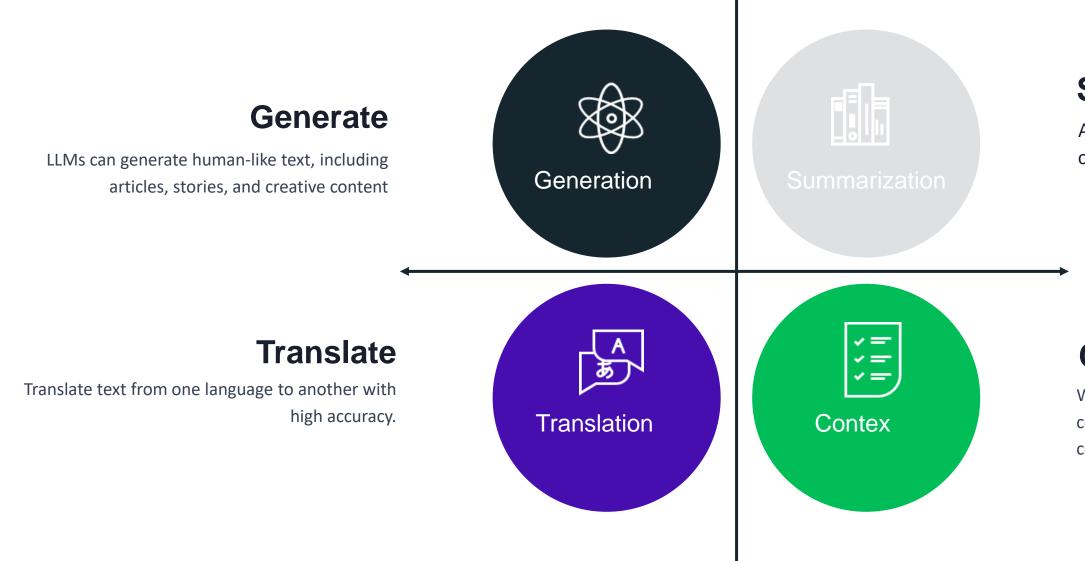

Foundational models that can generate high-quality text, images, and other content based on the data they were trained on.

WINS

Words Images Numbers Sounds

Product Overview (planned for 2024) Large Language Model

Models trained on large text datasets coming from all kinds of data sources

infor

Summarize

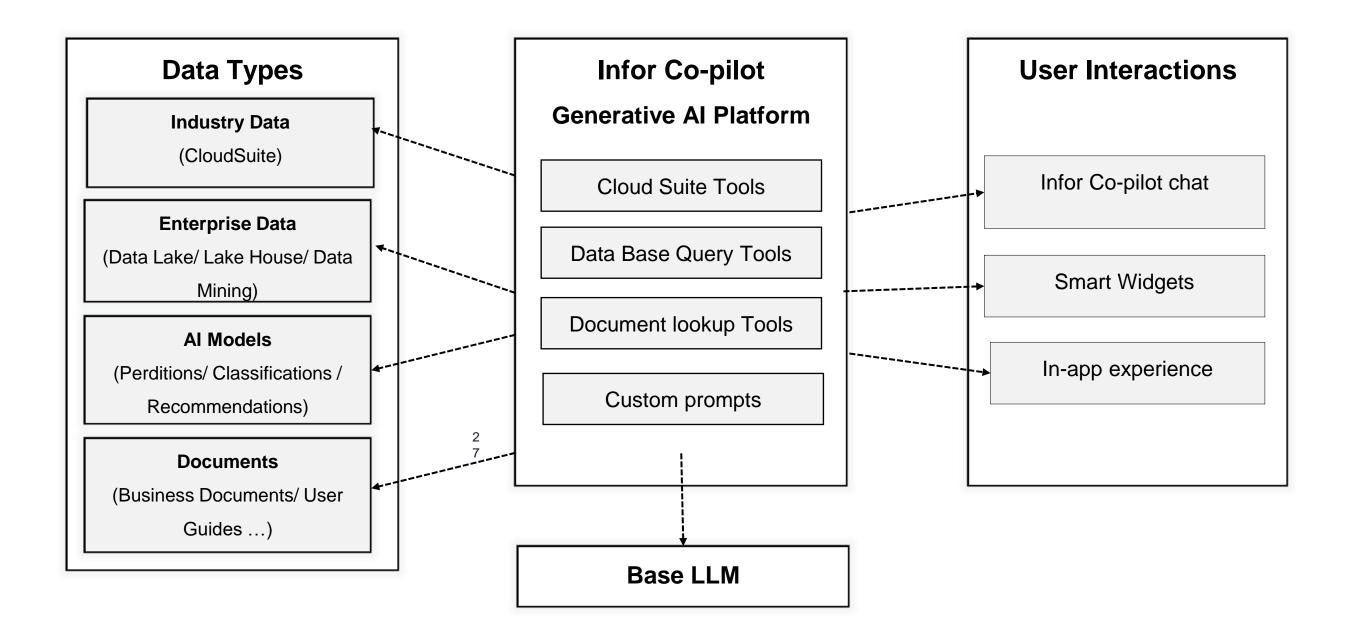

Automatically condense long texts into shorter, coherent summaries.

Contextualize and Analyze

Within a sentence or paragraph, LLMs analyze the context of a given word or phrase to generate coherent and contextually relevant text.

Four initiatives to support our customer

01

Sustainability improvement & reporting

A strategy management system that support our customers transformation to a sustainable business.

02

Sustainability taxes

A tax generator that by configuration can calculate, report and account for sustainability taxes

03

Product sustainability declaration

Changes in M3 to hold sustainability attributes per item. Capture for materials and components, added own impact by allocation from company totals. Used in prices list, business documents and processes.

infor

04

Process changes

Sustainability will I have impact on existing process and these changes are described in this section.

30

Sustainability Management (planned for 2024)

Application purpose

Help organizations effectively collect, manage, analyze, and communicate their sustainability-related data and performance.

A strategy tool to provide a clear picture of:

- How the organization affects different areas related to sustainability.
- How the organization is working with sustainability.

Vision, strategy, implementation, execution and follow up.

Sustainability improvement & reporting

Objective

Support our customer transformation to a sustainable world

Mission

Provide a new module for strategi support, that allows our customer to

- Create strategies to realize the transformation. (OKR principle; Objective and key results)
 - Define and follow-up activities
 that create the wanted
 transformation
 - Manage KPI to be used in the sustainability reporting.

The first strategy to be supported is "Sustainability improvements" 🧶 Zeelandia

What we want to do to get even better

Where we are

Configuration Management

Configuration Management is a tool that allow configurations to be copied from one tenant to another. This functionality is cross CloudSuite i.e., M3, Infor OS, ...

The information exported from one tenant is referred to as a local package and can be applied to all tenants of a customer. A package can be created in TST and then deployed both in TRN and PRD tenant.
