

Vad händer i April?

User Experience

Gunilla Andersson, Director M3 User Experience, Infor

Disclaimer

This course provides net-change training content for enhancements delivered in this release. The expectation is that participants have sufficient knowledge of the solution prior to participation in any release training. Release training is not offered for all enhancements. In the event Infor determines, in its sole discretion, not to offer release training for a particular enhancement, there should be sufficient content within the applicable Release Notes and other documentation provided with the release to provide an explanation of the change in the solution regarding such enhancement. Infor does not offer release training for maintenance updates. In addition, the training offered in this course is not intended to be a complete presentation of all problems and issues that may arise in connection with any enhancement. It is also generic and may not be accurate for all. Infor therefore makes no guarantees, or assumes any responsibility for the correctness, sufficiency or completeness of the material presented.

All business entity names, characteristics, products and other data portrayed in this production are fictitious. No identification with actual business entities, names, characteristics, products or other data is intended or should be inferred.

No part of this course may be reproduced or transmitted in any form or by any means electronic or mechanical, without the prior written consent of Infor.

Important news in April 2024!

- **Infor OS Portal will replace Mingle** – all Cloud customers will be automatically updated to Portal starting end of April (unless an exception is granted)
- **H5 Classic will be decommissioned in April 2024**
 - All customers will be directed to the new version of H5 automatically after the April maintenance window
 - The **new version of H5 is mandatory when running OS Portal**.
- From January 2024 there is a **new list component available for the new version of H5**. You activate this new list component via H5 Administration tools per user, role or tenant. The new list will have enhanced performance, and from April 2025 the new list is planned to be activated for all tenants.

Note: The new list component is not mandatory for OS Portal

New Design Theme

Executive summary

Support for the Alabaster theme in H5 and Experience Designer

Solution overview

Problem

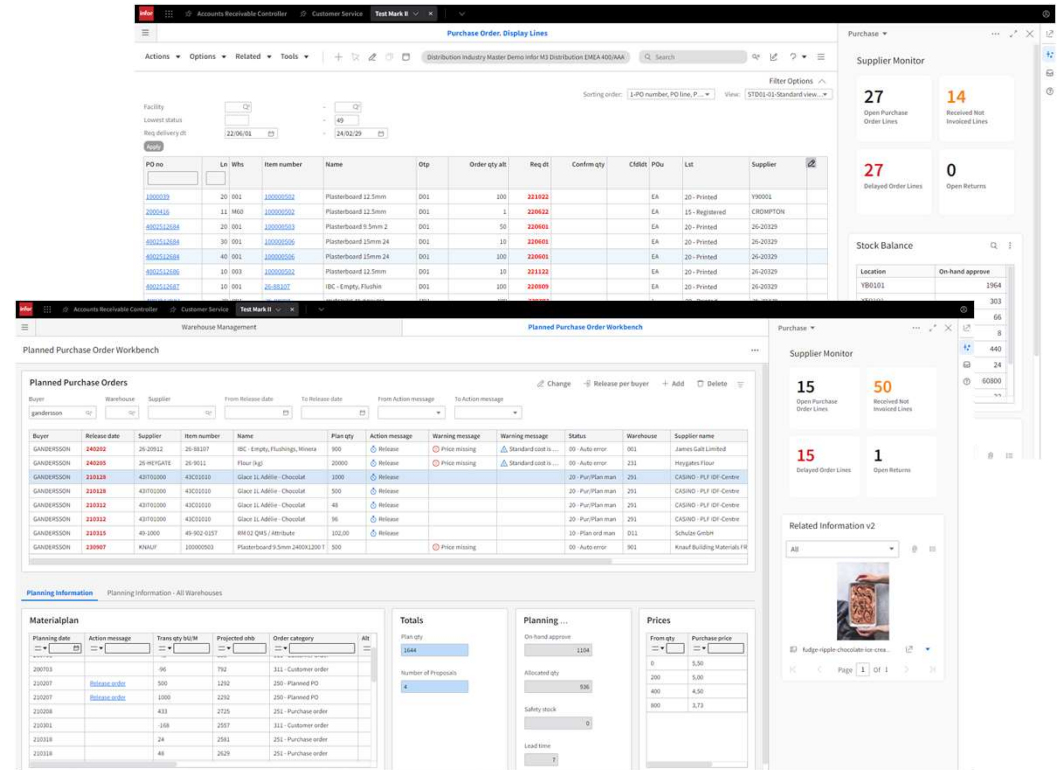

All Infor products in a CloudSuite does not have the same look and feel.

Solution

Introducing a new theme, Alabaster. This new theme will be default for new tenants. Existing tenants can choose whether they want to keep the old colors or start using the new theme.

Benefits

- ✓ The users will have a similar user experience no matter which product they use in the CloudSuite
- ✓ Alabaster is brighter and more open, bringing a modern aesthetic to our solutions and removing distracting color blocks.
- ✓ Alabaster reduces the visual and cognitive load for users, enhancing their overall experience.

Experience Designer

Executive summary

Experience Designer is a no-code tool for creating composite M3 applications. It was released in April 2023. Now we are delivering even more possibilities to use when configuring applications that will increase user experience and make the end users more efficient.

Solution overview

Problem

Experience Designer needs to continuously deliver new, enhanced capabilities to meet new requirements from our customers.

Solution

More capabilities added such as:

- Conditional styling
- Infor Business context support
- Button/Link component
- Group pane component
- Custom operations
- Group fields in a form
- Autoselect first row
- Override standard browse
- Vertical tabs with icons
- Custom input fields
- Enter/Input events

Benefits

- ✓ More usecases can be handled using Experience Designer
- ✓ Customers can benefit from fast development and easy maintenance compared to other tools available

infor

The image displays two screenshots of the Infor Warehouse Management application interface. The top screenshot shows the 'Purchase Order Lines' table with columns for Req delivery dt, PO number, PO line, Item number, Order qty, Received qty, PO U/M, Supplier, Lowest status, Highest status, Buyer, and Warehouse. The bottom screenshot shows the 'Stock Balance' table with columns for Warehouse, Item number, Acquisition of, On hand approve, Allocated qty, On hand inspect, and Safety stock. Both screenshots also show 'Warehouse Information' and 'Item Statistics' components.

H5 and M3 widgets

Executive summary

To provide an efficient and modern user experience the M3 user interfaces are continuously updated. In this release there are enhancement for both H5 and M3 widgets.

Solution overview

Problem

The M3 User Interfaces needs to be continuously updated with new, enhanced capabilities to meet new requirements from our customers.

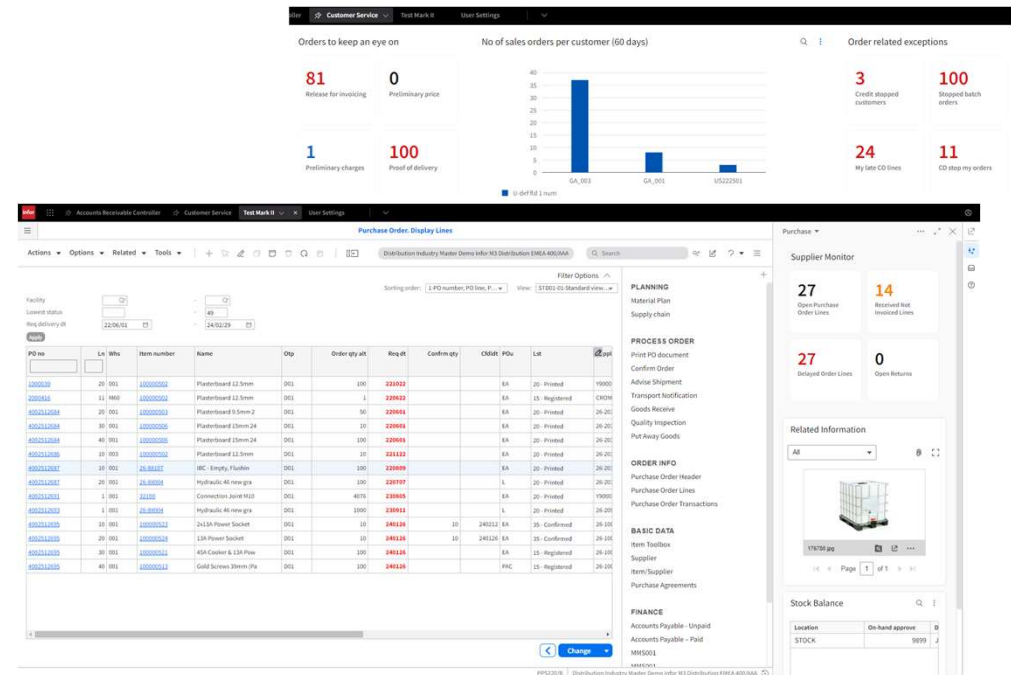

Solution

More capabilities added such as:

- New look and feel of the M3 Information Monitor, possible to show monitors as tiles
- Updated H5 client, new list component (performance)
- Possibility to edit shortcut links
- Change start date and show week number in datepickers in H5
- New look and feel of the M3 Menu and list headings

Benefits

- ✓ Enhanced user experience
- ✓ Simplified handling of shortcuts

Demo

Summary

- A lot of new functionality will allow you to do even better applications!
 - Styling for better visibility and increased navigation
 - New design theme will make the screens less “heavy” and improve the user experience
 - Infor Business context will allow you to connect to Smart Panel
 - New components gives new possibilities to create the best experience for your users
