NEFAB OVERVIEW

OUR OFFERING

Packaging Solutions

Logistics Services

Optimization Programs

Telecom & Datacom

Energy

Automotive

Healthcare

LiB

Other Industries

CUSTOMERS IN MULTIPLE INDUSTRIES

REVENUE

966 MUSD (2023)

OWNERSHIP

Nordgren/Pihl

FAM (Wallenberg)

50%

50%

GLOBAL SUPPLY & LOCAL SERVICES

OUR CAPABILITIES

NEFAB
SAVING RESOURCES

+100 sites in 38 countries

+4700 employees

+250 engineers worldwide

6 ISTA test labs

BACKGROUND

Why

- Old Dynamics platform – outdated and not supporting strategy going forward
- Acquisitions and local application increasing – creating more complex reporting environment
- Harmonize business processes and data structure across the group

How

- Build strong core to enable quick rollout
- Core setup build with global team and business stakeholders
- Keep the core throughout the rollout by strong ownership.

Vision

- Rollout factory to execute a predefined solution
- Data migration "factory" enabler for speed

ERP ROLLOUT

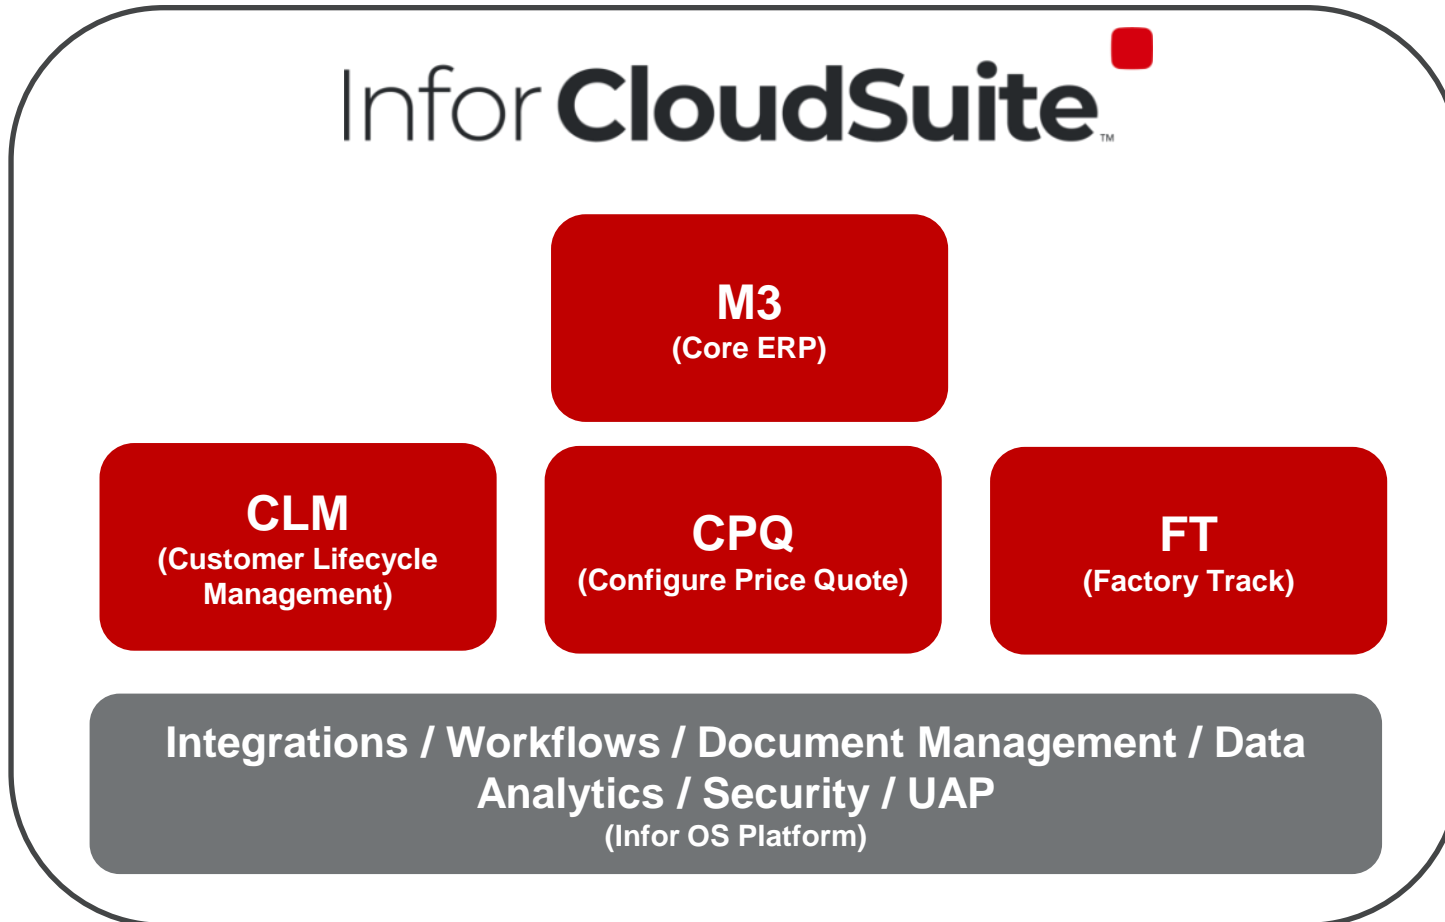

MAJOR STEPS IN THE PROGRAM

- Solution overview
- Rollout preparation
- Rollout execution
- Support & Governance

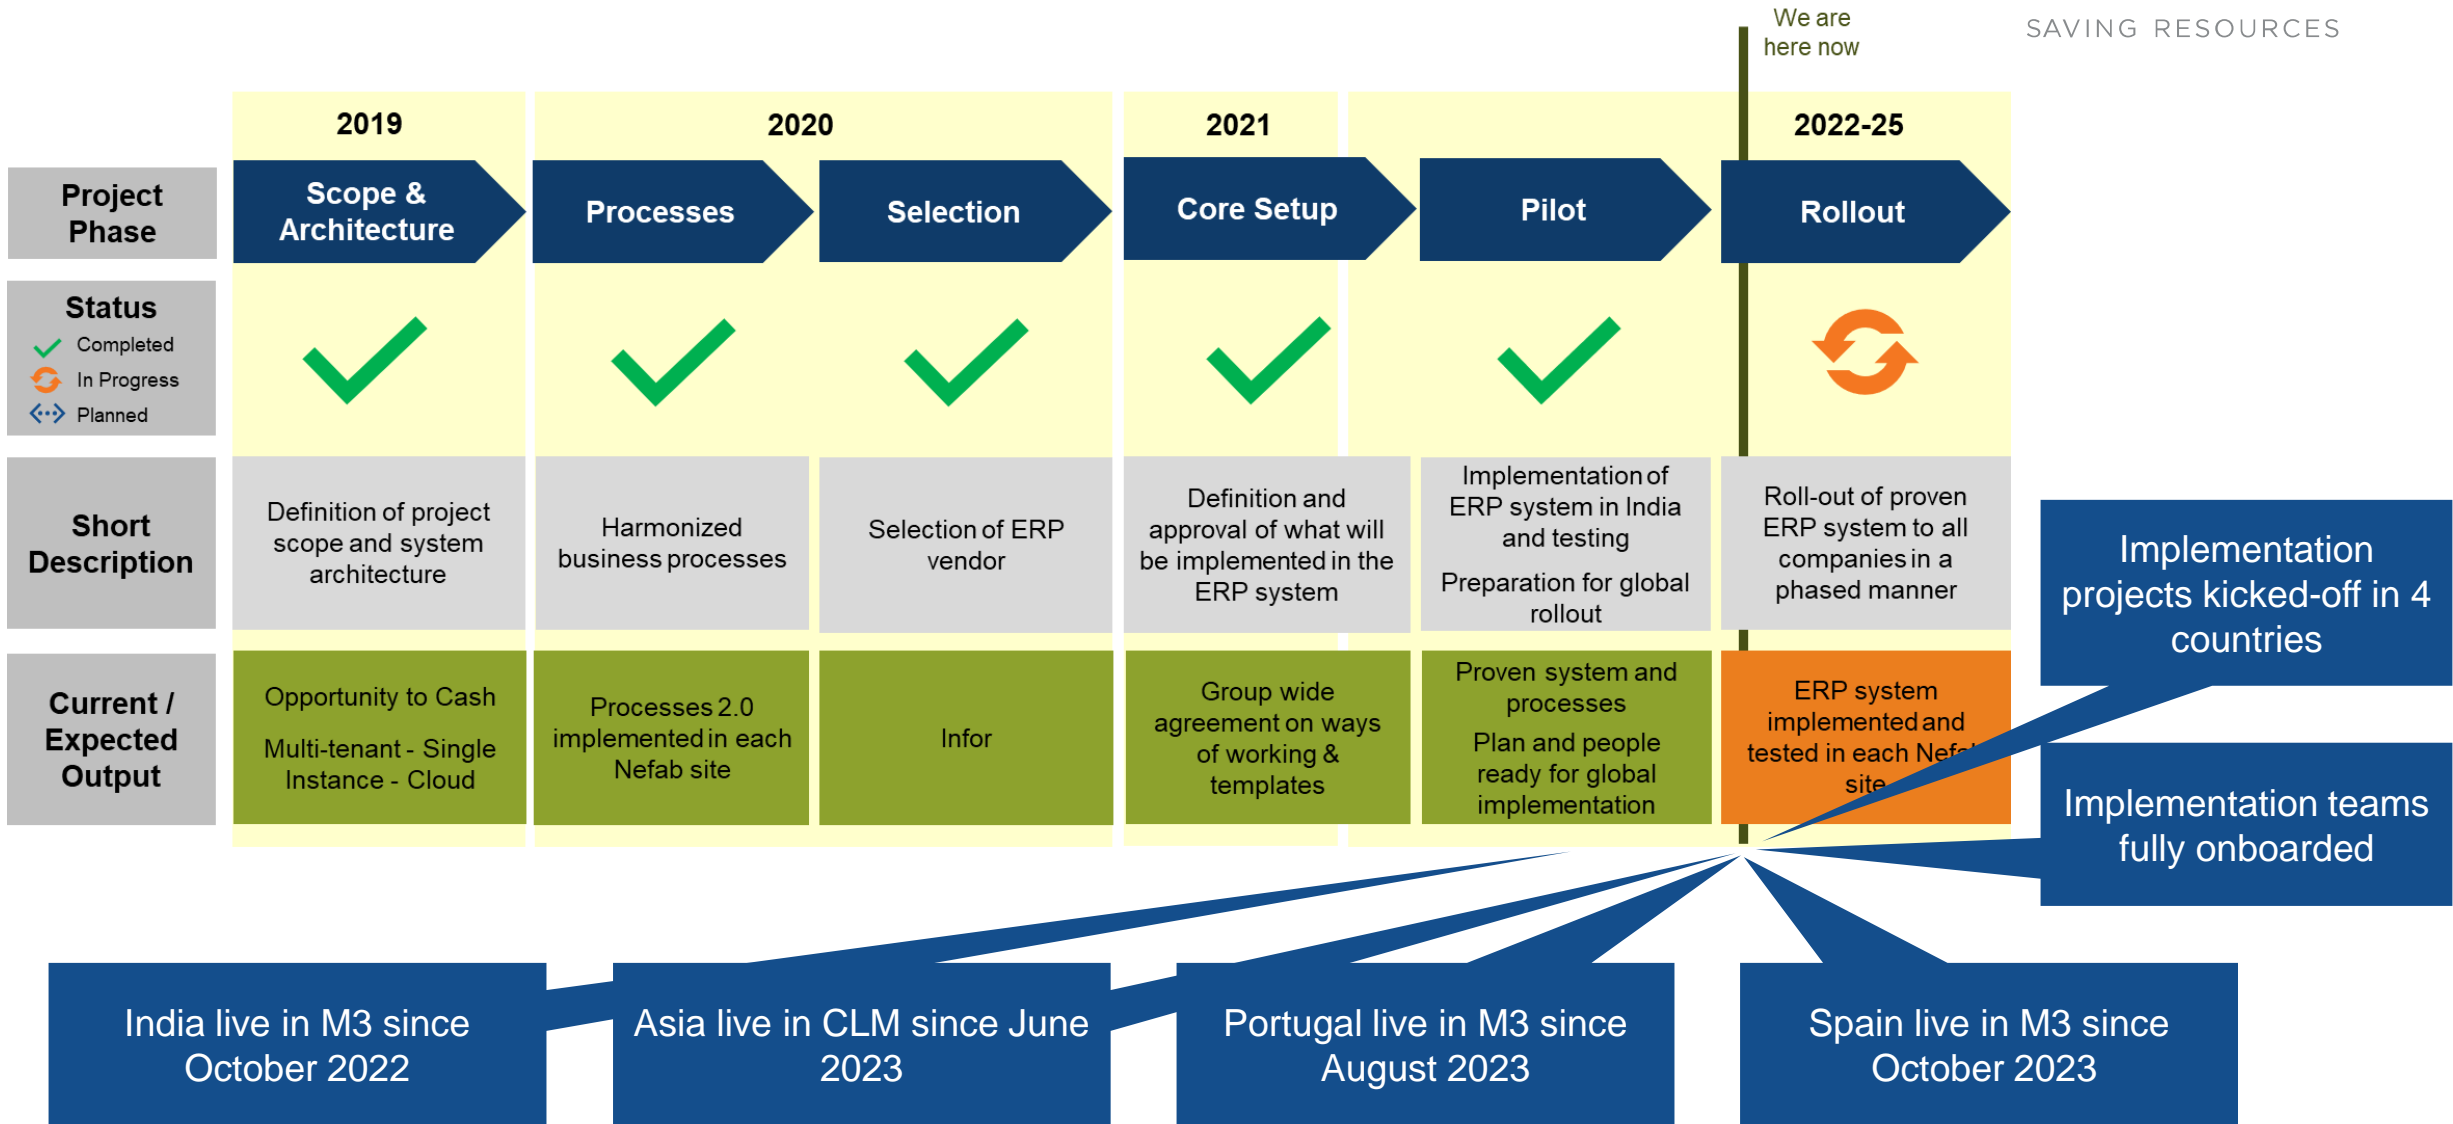

ERP PROGRAM OVERVIEW

INFOR CLOUDSUITE

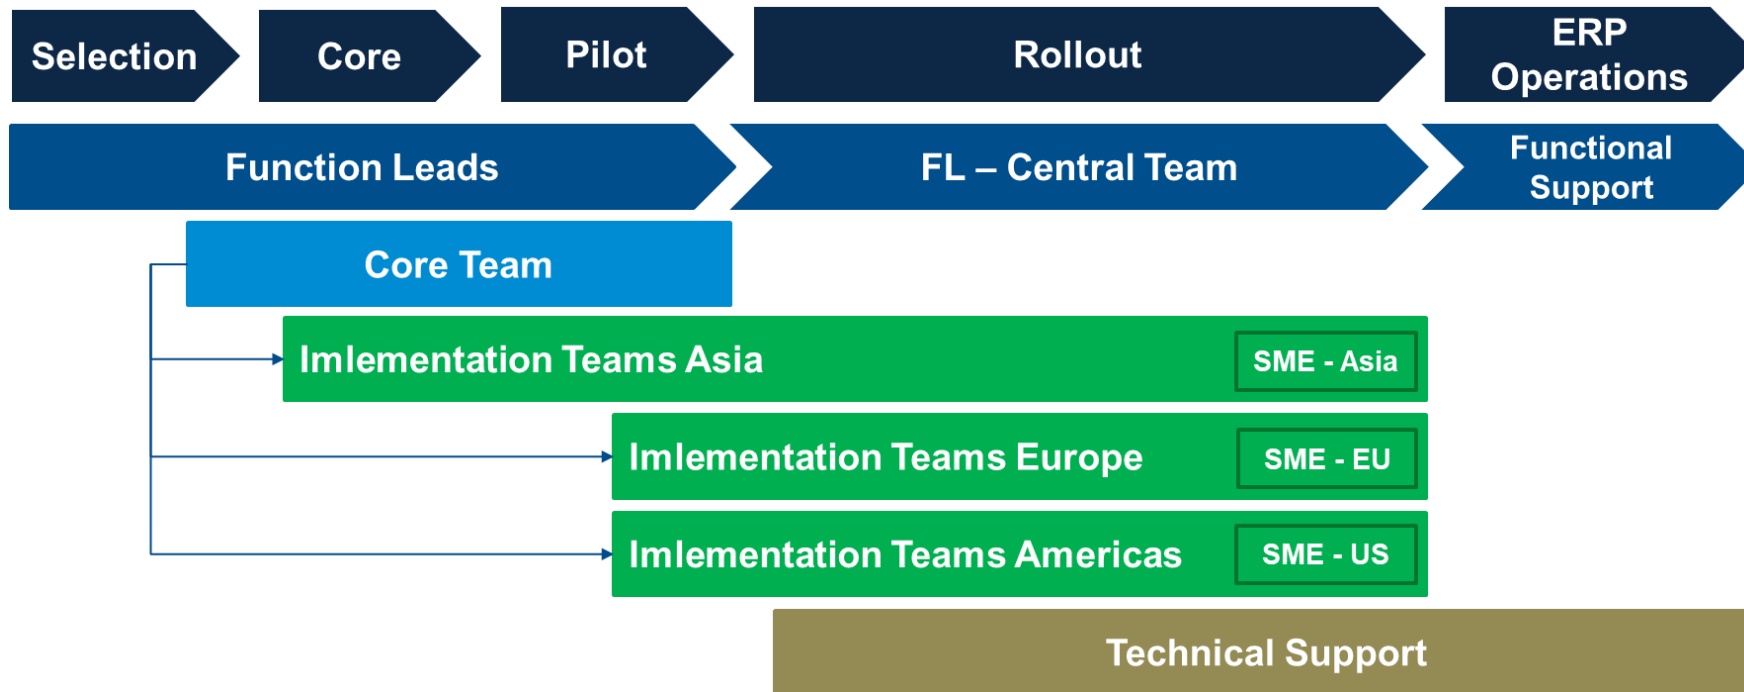

- Total 1500 users across Infor CloudSuite
- IPC as starting point – adjusted and improved for Nefab
- UAP for user instructions and training material

NEW NEFAB ERP

RESOURCE & ROLLOUT STRATEGY

Functional Leads continue from core & pilot into the rollout and ultimately form the ERP Operations line organization

Resources recruited and trained during Core and Pilot form the bulk of the Implementation Teams

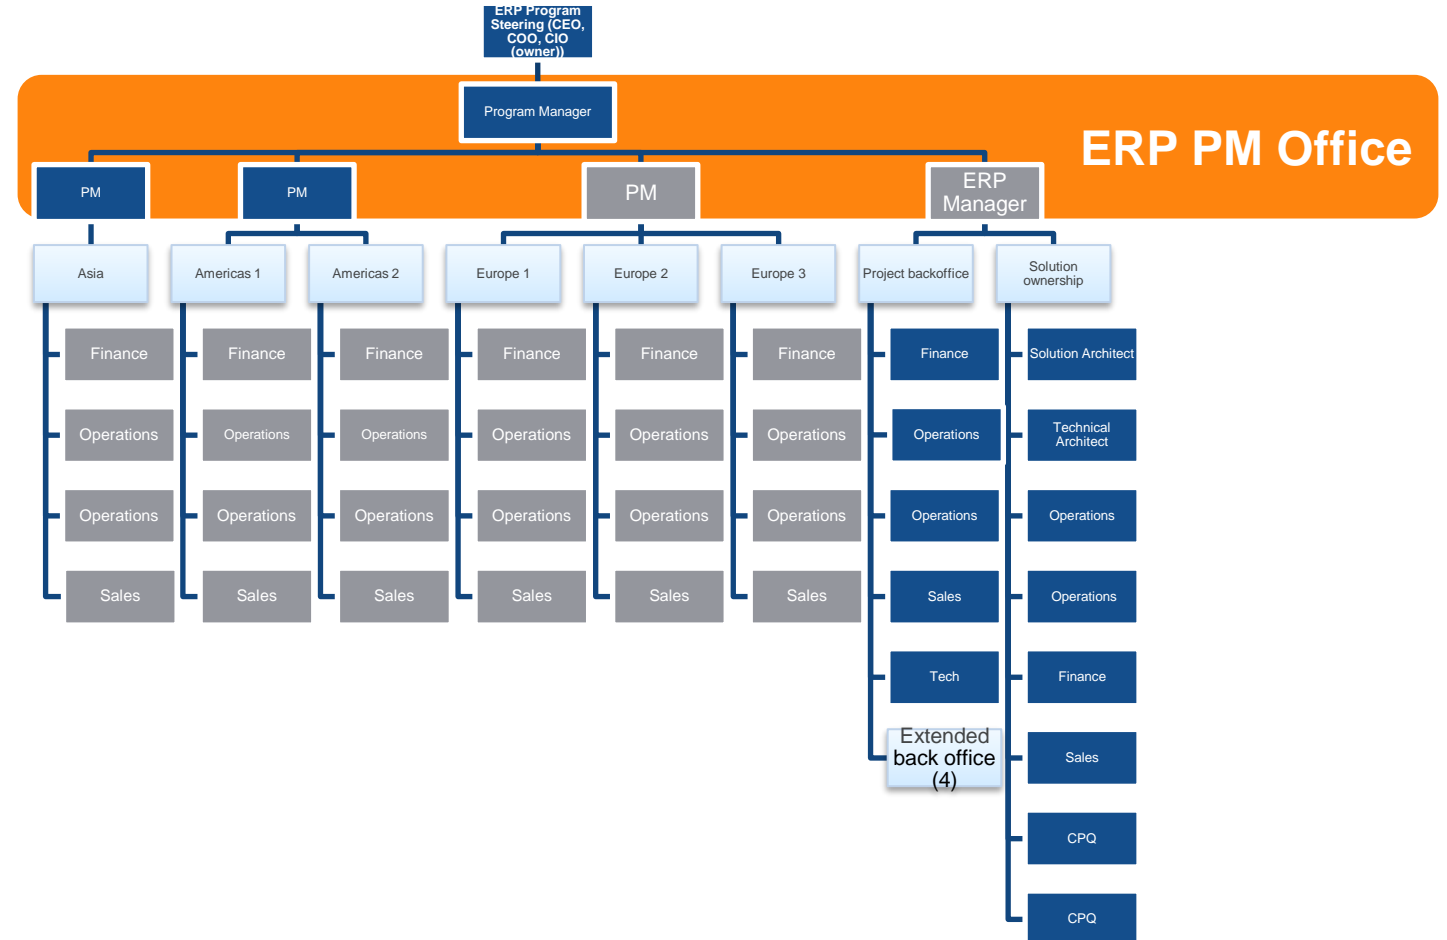

Technical support for integrations and other "IT" parts of ERP shall be setup as a combination of internal and ERP vendor provided resources

PROJECT ORGANISATION

ACTUAL

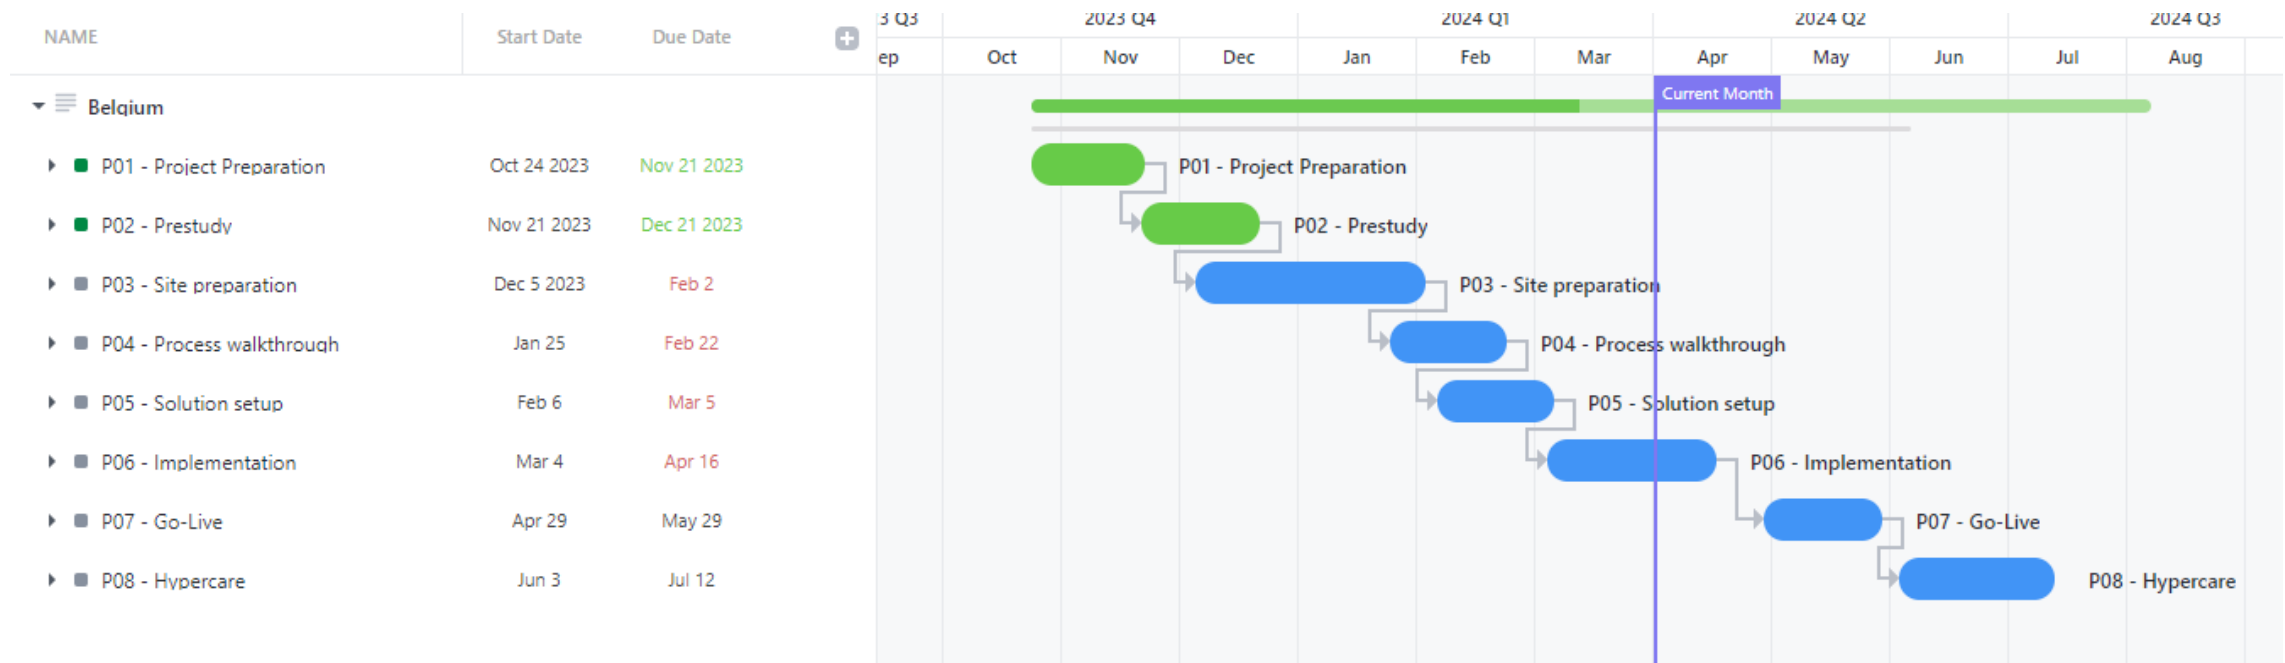

- 5 functional implementation teams
- 1 central team
- 1 project back office
- Split over 10+ countries

IMPLEMENTATION PROJECT

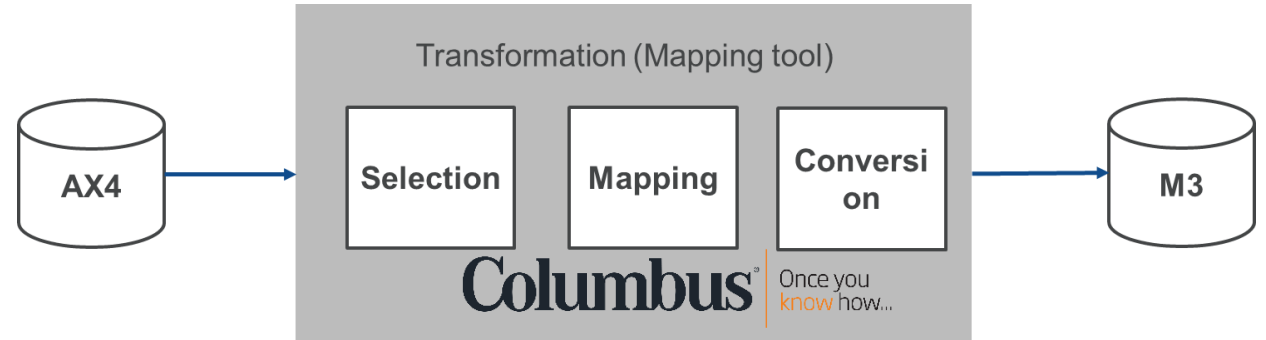

- Project timeline 3-6 months
- 2-3 rounds of data migration
- Prestudy in a simplified way

DATA MIGRATION PROCESS

Migration content

- Migration is executed based on predefined rules and mappings.
- No "manual" intervention between AX4 and M3.
- Migration focus only selected masterdata with predefined filters
 - Item with transactions past 24 months
 - Customer same as above

Consequences

- Data quality is important
- Preparation of data can start months before the actual project
- Validation files and check-files available for local projects

CHALLENGES

- Change management
- Business similarity
- Data quality
- Roles & responsibilities in a Global organization
- Pilot Project
- Solution readiness

HOW DO YOU SUCCEED....

- People & Partners
- Celebrate success
- Stakeholders in business
- Change management
- Manage project scope

THANK YOU! ANY QUESTIONS?
