M3 Experience Designer

Integrated part of the standard M3 user interface

Customers get, not only the customizable standard user interface, but also a fully integrated toolset that let them configure tailor made applications for their specific needs.

Any industry, any process, any user

M3 Experience Designer is a tool, not a one-off application. We support all our focus industries, any customer process, any user.

Why?

- Gives M3 a truly modern user experience.
- There is no "One UI fits all".
- Give all customers a chance to create their own user experience in a cost-efficient way.
- Offer a tool that is easy to use and easy to learn.

- Leasing Agreements
- Rental Counter
- Cash Flow Credit Control
- General Ledger Administration

How to learn more

- Education videos on Infor U search for Experience Designer
- User and administration guides on docs.infor.com (<u>M3 Core</u>)
- <u>KB2295809</u> (Service Now)
- Other areas you need to know:
 - APIs (M3 Metadata Publisher)
 - M3 Functional Search
 - CMS010/015

How to see context messages - widgets

When configuring workspaces where widgets talk to each other it is helpful to use the Context Viewer widget to see what values the widget sends.

Add the context viewer to your workspace, change context type to inforWidgetContext to see the correct data.

How to see context messages – H5

If you want to see what business context you get from an H5 panel, add the Context Viewer widget to the smart panel.

You can see all business context using MDP/MNS035MI. With that API you can also add business context to fields that are missing in the standard setup.
