Disclaimer

This course provides net-change training content for enhancements delivered in this release. The expectation is that participants have sufficient knowledge of the solution prior to participation in any release training. Release training is not offered for all enhancements. In the event Infor determines, in its sole discretion, not to offer release training for a particular enhancement, there should be sufficient content within the applicable Release Notes and other documentation provided with the release to provide an explanation of the change in the solution regarding such enhancement. Infor does not offer release training for maintenance updates. In addition, the training offered in this course is not intended to be a complete presentation of all problems and issues that may arise in connection with any enhancement. It is also generic and may not be accurate for all. Infor therefore makes no guarantees, or assumes any responsibility for the correctness, sufficiency or completeness of the material presented.

All business entity names, characteristics, products and other data portrayed in this production are fictitious. No identification with actual business entities, names, characteristics, products or other data is intended or should be inferred.

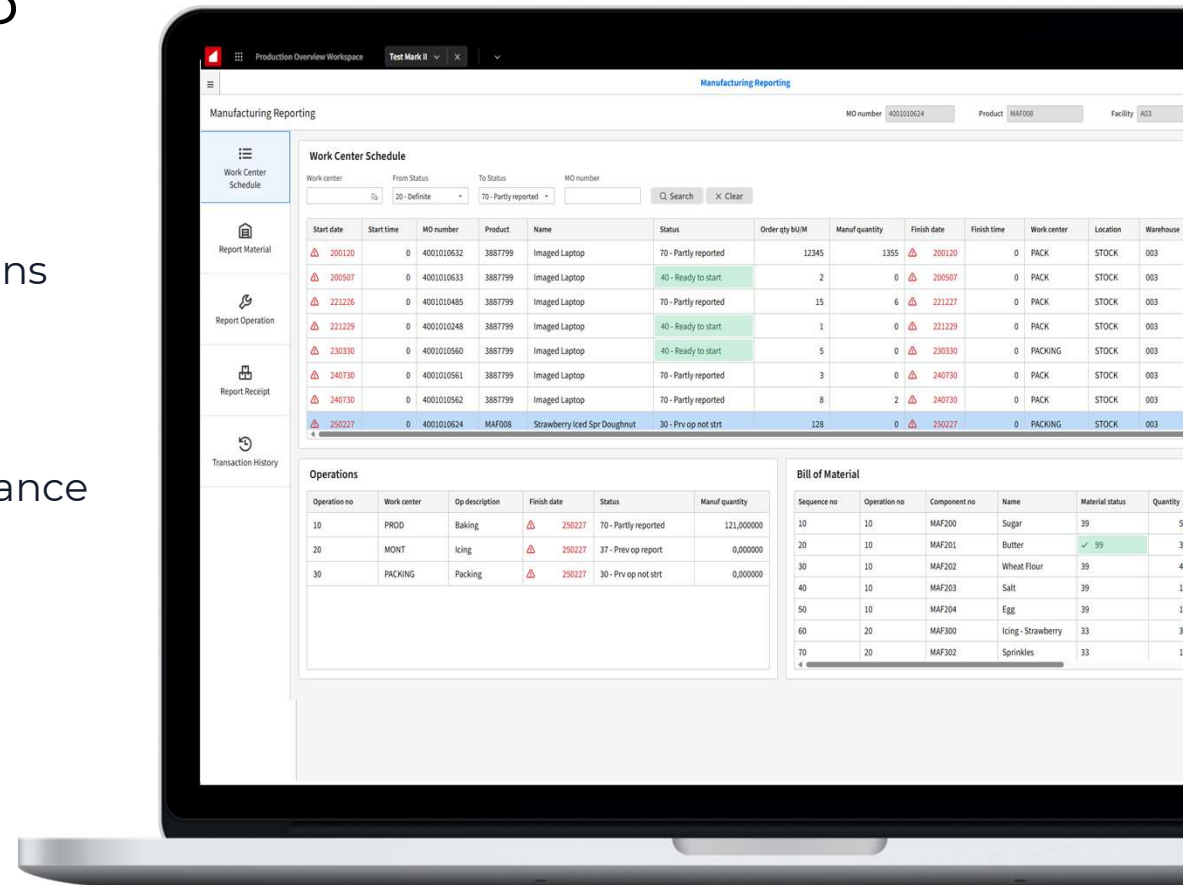

No part of this course may be reproduced or transmitted in any form or by any means electronic or mechanical, without the prior written consent of Infor.

The M3 User Experience

Trends Transforming ERP

- ERP is the core of business operations
- Embedded AI for decision support
- Conversational and proactive assistance
- The power of industry-specific AI
- Trust and explainability are critical

Persona-driven User Experience

The screenshot displays a comprehensive production overview workspace. At the top left, a 'My Day' widget shows the user's name, Gunilla, and the date, Friday, March 14, 2025. Next to it is a bar chart titled 'Overdue MOs' showing the total number of overdue Manufacturing Orders (MOs) from 2024-05-09 to 2025-03-13. Below this, a 'My Open MOs' table lists various MOs with columns for MO number, Product, Name, Order qty, and Manufact quantity. The main area features a 'Manufacturing Reporting' section with a 'Work Center Schedule' table and a 'Bill of Material' table. The 'Work Center Schedule' table includes columns for Start date, Start time, MO number, Product, Name, Status, Order qty, and Finish date. The 'Bill of Material' table includes columns for Sequence no, Operation no, Component no, Name, Material status, Quantity, and Reserved qty. On the right side, there are 'Item Information' and 'Assisted Text Authoring' panels.

Workspaces & Widgets

- Your start experience
- Tasks that needs attention
- KPIs and quick links

Applications

- Complete tasks and take action
- Tailored for roles & processes
- Unified M3 experience

Insights

Elevating the M3 User Experience

What's next?

GenAI meets Experience Designer / H5

End User

- Search data using natural language
- Possibilities to generate texts
- Possibilities to summarize data
- Use prompts to help the user add data, update data
- Incorporate ML data in the applications

** Work in Progress **

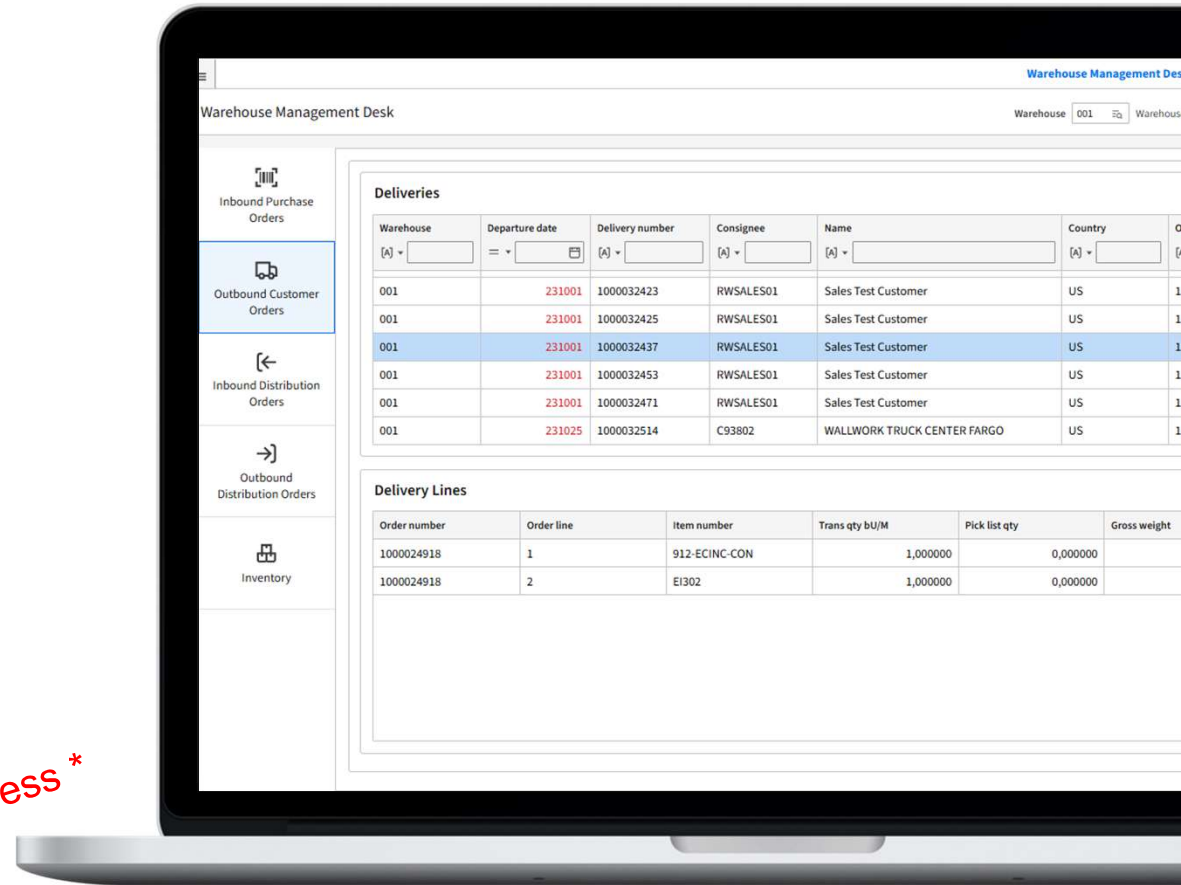

GenAI meets Experience Designer

Super User/Administrator

- Create new applications
 - Existing standard applications plus various documentation serves as base
- Add content to existing applications
 - Start from a standard application, add new lists, forms etc
- Improve configuration efficiency
 - Translations
 - Styling

** Work in Progress **

Thanks for listening!
